N. B.—Orders should be addressed us at Flushing, and sent per Mail.

Catalogues, which are sent to purchasers of Trees, and to applicants who inclose stamps.—No. 1, Fruit and Ornamental Trees, Shrubs and Plants. No. 2, Roses, Dahlias, Bulbous and Herbaceous Flowering Plants, &c. No. 3, Extra large Fruit Trees, Evergreens, and other Ornamental Trees and Shrubs. No. 4, Wholesale Catalogue for Nurseries and Dealers, comprising Trees, Shrubs, Plants, Stocks for Engrafting, and Tree and Shrub Seeds, &c. No. 5, Catalogue of Garden, Agricultural, and Flower Seeds. No. 6, Descriptive Catalogue of the Finest Strawberries. No. 7, Rare American Trees, Plants, and Seeds, suitable for sending to Europe. No. 8, Supplement Catalogue of Bulbous Flowers, New Dahlias, Pæonies, Chrysantherums, Ploix, Carnations, and other Rare Flowering Plants. No. 10, Wholesale Catalogue of Bulbous and Tuberosus Flowers. No. 11, Treatise on Culture of Chinese Potato, or DROSOCOREA BATATAS; on Licorice, Tanner's Sumach, Fig, Almond, and Olive.

—♦♦♦—
FORTY-FIRST EDITION.

CHINESE POTATO.

DIOSCOREA BATATAS, IMPERIAL RICE-WHITE VARIETY.

I INVITE the public to view my plantation of two-and-a-half acres, containing 35,000 plants of this inestimable esculent. I am desirous to identify myself with the introduction of this most important plant; and after having devoted half a century to horticultural pursuits, I ask no greater boon of my countrymen than to award me this claim, which I am striving to merit more fully by its extensive culture. I shall also be thereby enabled to supply the many correspondents hereafter, whom I was unable to supply in April without then breaking into the arrangements for my present plantation.

Having most fully investigated the merits of this esculent, I have a few positions to state in regard to it, which, being somewhat bold in their character, I wish my countrymen to record for future verification. 1st. I assert that the *Dioscorea Batatas* of *Decaisne*, is perfectly hardy during our severest Winters. 2d. That it is more nutritious than any other esculent we cultivate. 3d. That its culture is so easy and simple, and its product so great, that it can be afforded incomparably cheaper than any other nutritious vegetable, it having produced in France at the rate of above 800 bushels per acre. 4th. That the combination of every useful property, renders it the greatest vegetable boon ever granted by God to man, and that its introduction to our country is even more important than that of cotton, and that in twenty years our National statistics will report the value of the annual crop as greater than the Cotton crop.

Next I assert, that this plant alone has served to solve the enigma as to the alimentary basis of the Chinese empire, and that a statistical investigation will prove, that if that country were deprived of this one vertical root, and received in lieu every other known vegetable, more than one-half of its enormous population would perish from famine. Further, I assert, that such are its superior properties—the three most important of which I have above detailed—that it is destined not only to supersede every other potato and every similar esculent in all countries of the temperate zone, but that it will attain in all these countries the position it occupies in China, and will consequently usurp a portion of the position which is now occupied here by Indian Corn and by Wheat; it being perfectly competent to make good bread, similar to that of Wheat, and capable of being afforded at an incomparably cheaper rate. As the roots propagate so easily and rapidly, it will, after a few years, become generally disseminated; but, for the first four or five years, millions of dollars will be made by its early cultivators, until all countries are supplied. The stupidity and ignorance of those who have maliciously assailed this plant, will be understood by the perusal of an address delivered by me before the American Institute, which institution awarded its Silver Medal for this vegetable, and has also in its transactions recommended its culture as a substitute for the common potato. The Secretary, the Hon. Henry Meigs, has made a most triumphant Report in regard to its successful culture in France. The statements pretending to emanate from the Farmers' Club of the American Institute, the last Spring, unfavorable to this plant, were barefaced forgeries, made from malicious motives,—as was fully exposed. At the present time there are nearly one thousand persons in the Union who have the Chinese Potato under culture (mostly supplied by myself,) and the public cannot fail to obtain from them satisfactory and conclusive information the present Autumn, for their future guidance. Persons who are desirous of ample information as to the last year's successful culture in Europe, can consult the "Mark-Lane Express" and "Gardeners' Chronicle" of Great Britain, and the "Révue Horticole," published under the direction of the French Institute; which latter, in its last Quarterly, for 1855, devotes twenty entire pages to the experiments and culture of this plant, and concludes with the following astounding announcement:—"This esculent has now been tested in every department of France, even to its most northern limits, the shore of the Rhine, and it is to be deemed, henceforth, incorporated into the Agriculture of France." I have taken especial pains to inform myself fully, by examining several very extensive Chinese Agricultural works which have been translated by order of the French Government, and it is the perusal of these works and their elaborate details as to the extensive culture of this root in China, which have most fully confirmed in my mind the vast importance of this inestimable esculent. Exhibitions will be made of these splendid roots at the Crystal Palace Fair of the American Institute during the present month, surpassing any that have been produced in Europe, their successful culture here being most triumphant, and surpassing the most sanguine expectations.

FLUSHING, New York, Oct. 1st, 1856.

WM. R. PRINCE.

N. B.—The *Dioscorea Japonica*—Japan Potato, and other kinds, we only cultivate as fancy varieties.

TERMS FOR THE CHINESE POTATO.

In order to facilitate its general dissemination, I will, until October 30th, contract as follows, deliverable in October:—For 100 to 1,000 tubers, \$15. Terms.—One-fourth of the amount to be remitted with the order, and the balance payable on delivery. Twenty-five tubers for \$5,—Cash to accompany the order. After Nov. 1st we shall most probably advance the prices considerably, and again increase them in the Spring.

NOTE.—I shall communicate in future through the "Tribune" Newspaper such information as I may deem most important in regard to the Chinese Potato, and of most interest to cultivators.

W. P.

WM. R. PRINCE & CO.

FLUSHING, NEAR NEW YORK.

ANNOUNCEMENT AND GENERAL REMARKS.

THE Senior Proprietor, Wm. R. Prince, having devoted more than half a century to Pomological and Horticultural pursuits, and desiring now to withdraw from all active business, has transferred the control of the Nurseries to his son, *William Prince*, who, with his associates, will conduct the establishment in its future operations. W. R. P. will, however, give his general supervision to some of the most prominent objects.

Since the publication of the last General Catalogue of Trees, Shrubs, and Plants, an additional plot comprising 40 acres of excellent Farm land, very favorably situated, has been added to the Nurseries, on which are now growing several hundred thousand trees, in addition to our previous extensive stock.

This and the other Nurseries are all on what may be termed *new soil* (in regard to Tree culture), no trees having been previously grown on them; as the building innovations have pressed upon our path so rapidly that the lands formerly occupied by our Nurseries are now populous streets, studded with dwellings. The natural strength and fertility of the soil of this locality is such, that it ensures a most healthy and vigorous growth to the trees, which seem to become hardened and confirmed as they progress, and is devoid of that rank, stimulated, and unnatural exuberance which trees so generally exhibit when reared on lands that have never been subjected to previous culture. The Trees thus cultivated, after making at first a rapid development, are so sensitive to cold, that the winter easily affects them, and they gradually pine away till they become feeble and unproductive.

The climate of *Long Island* being subject at all times to the boisterous winds of the Ocean and the Sound, seems to be particularly favorable to perfecting the hardiness of Trees. The vacillations of alternate cold and mild periods during the winter, accompanied by the frequent freezings and thawings to which trees are here subject throughout all stages, prepares them for the endurance of the utmost degree of cold and rigor incident to the most northern latitude; it being found that trees, like men, become much more hardened in a changeable climate than in one regularly cold where the constitution is not subjected to trials.

It is doubtless from this cause that the Long Island trees, with which New England has been generally supplied, and also those which have been sent to the coolest regions of the West, have been found to better withstand the severest winters, than those which have been obtained from other localities. Indeed it can be readily realized that trees so robust and hardy, and yet so vigorous, must possess a great superiority over those grown in localities where the mercury sinks each year to 10° and 20° below zero during a very prolonged winter, thus retaining the trees in a frozen, torpid and death-like state for many months, freezing and bursting the inner vessels, affecting the sap, and weakening them to such a degree that they can never regain their original health and strength. Some lessons may be derived from the fatal experience of the two past winters at the West, to which may be superadded the inconsiderate use by many nurseries of unsuitable stocks for budding and grafting, and especially of the tender Mazzard stock for Cherries, instead of the hardy Mahaleb, the latter alone being suited to the North and West.

Our large General Catalogues, which have been distributed throughout the Union, comprise every estimable variety of Fruit ripening throughout the year, and especially such as have been recommended by the different Pomological Conventions, and embrace Trees of the usual sizes for planting in Orchards and Gardens. All are in the most healthy and vigorous state, and will be supplied at the rates named in the present Catalogue; and it may be taken as a rule that we will at all times sell as low, and many articles lower than they can be obtained elsewhere, of *equal size and quality*. The *Extra-Large sized Trees*, which are in a bearing state, have required many years to bring them to their present size, and are such as can seldom be obtained elsewhere, and are worthy of the special attention of those who desire *Fruit Trees for immediate bearing*, whereby many years are gained in the planting of Orchards and Gardens. The *Extra-Large sized Ornamental Trees and Shrubbery*, including the Large sized Evergreen, are worthy the particular attention of those who desire to promptly embellish their Lawns, Avenues, and other Grounds, and many of them are especially adapted to Cemeteries. None of the Apples and Pears, or other Fruit Trees, are grafted on pieces of roots, as has been inconsiderately the practice elsewhere.

Our collection of estimable Fruits of every class, and of Ornamental Trees and Shrubs, including Evergreens, is more general and extensive than any other in our Country. We do not here, as is customary and necessary in the western Nurseries of our State, cover three fourths of our grounds with Apple Trees and other common Fruits; but in accordance with the general demands of our Correspondents, we embrace an assortment very enlarged and comprehensive. It will consequently be seen that of Ornamental Trees and Flowering Shrubs, Evergreens, Roses, Climbers, Bulbous Flowers, and Herbaceous Flowering Plants of every Class, there is no comparison between the collections in the Flushing Nurseries and some distant ones, which have been unduly puffed for their extent in

acres. Distant purchasers, and especially those located in the new and rising States of the North and West, should not allow themselves to be duped by gross misrepresentations emanating from interested sources, but should make it an indispensable duty to visit and inspect the Long Island Nurseries to their perfect satisfaction. We append hereto (on the cover) a list of the ten Catalogues, comprising all the departments of our Nurseries, each with prices annexed.

In consequence of the railroad which connects Flushing with the city of New York being laid 2,000 feet through one of our largest Nurseries of fifty acres, we will supply Nurseries and others requiring large numbers of Trees at reduced rates, and on the most liberal terms, as that portion of our lands is required for building lots. We especially suggest to younger Nurseries the importance to them of securing genuine warranted fruit Trees of our superior varieties, many of which are not obtainable elsewhere.

All trees, &c., are labeled and packed in a superior manner, in matted bales or boxes, so that it is scarcely possible that any can be injured; and we charge for the packing barely the actual cost. We ship the packages, or send them by Railroad, by the Transportation Lines, or Express Lines, precisely as ordered, and we send the receipt for the packages with the invoice to the purchaser, and there is consequently the best security for their delivery. After being thus expedited by us, they are at the risk of the purchaser, and the forwarders alone are to be held responsible therefor. Remittances may be made by Check or Draft; but if Bank Notes are sent they should be forwarded through the United States Express, American Express, or Adams' Express Co's., and the Agent's receipt therefor be sent to us. New York or Eastern Bank Notes are best, as there is a discount on Western notes.

Orders for Trees, &c.—It is indispensable that every order be plainly and regularly made out, naming the edition of the Catalogue selected from, and also that plain directions stating how the packages are to be marked and forwarded should immediately follow the order, and that these be entirely distinct from the letter. It is also necessary to state in the orders for Fruit trees, whether Standards, Pyramids, or Dwarfs are wanted, and on what stock each kind is preferred. When any variation is allowed as to the precise kinds, by substituting others equally good or better, or when the selection of all or part of the varieties is left to us, we will exercise our judgment for the interest of the purchaser; and we cultivate none but the choicest varieties. If an error of any kind should occur, we desire to be promptly notified, that it may be rectified at once.

Specimen Trees.—Whenever single specimen Trees are ordered by any Nurseryman or other person, they will be charged at the retail price without discount, the extra time required to make such selections being important to us, and their accuracy of vital importance to the purchaser. We have never employed any Traveling Agents, and caution the public against a scoundrel who professes to represent the Flushing Nurseries and has repeatedly stated he acted for us. If we should conclude to employ any Agents, their names will be announced in the Horticulturist; but we much prefer to do our own business by direct correspondence.

N. B. It seems almost superfluous to remark, that all the Trees and Shrubs in this Catalogue not stated to be tender, are hardy.

APPLES—PYRUS MALUS.

Standard Trees of usual size for Orchards, 25 cents.

“ of larger size, 4 to 5 years grafted, 37 cts.

“ very large, 6 and 7 years grafted, 50 cts.

N. B.—The two last-named sizes are such as are seldom obtainable from Nurseries.

Dwarf Trees, 25 to 37 cts.

Above 400 varieties are cultivated, comprising every estimable variety described by Thomas, Downing, Manning, Barry, Kenrick, and Ives, and by the London Horticultural Society. The following comprise a selection of the most estimable, and we exclude a large number of worthless varieties which are comprised in many Catalogues.

SUMMER VARIETIES.

- | | | |
|---|---|-------------------------------------|
| 1 Benoni, <i>very fine.</i> | 10 Garretson's Early, <i>very fine.</i> | 18 Red Astrachan. |
| 2 Bevan's Favorite. | 11 Golden Sweeting, | 19 Sinequanon. |
| 3 Blinkbonny, <i>very fine</i> , 50 cts. | 12 Keswick Codlin. | 20 Summer Bellflower. |
| 4 Buffington Early. | 13 Large Yellow Bough. | 21 Summer Haglooe. |
| 5 Corse's Favorite, <i>fine</i> , 50 cts. | <i>Early Bough.</i> | 22 Summer Pearmain (<i>Amer.</i>) |
| 6 Early Harvest. | 14 Lyman's Large Summer. | 23 Summer Queen. |
| 7 Early Joe. | 15 Primate. | 24 Summer Rose. |
| 8 Early Red Margaret. | 16 Pumpkin Sweeting. | 25 Summer Russet. |
| <i>Red Juneating.</i> | 17 Red and Green Sweet (<i>mon-</i> | 26 Summer Sweet Paradise. |
| 9 Early Strawberry. | <i>strous</i>). | 27 Williams' Favorite. |

AUTUMN VARIETIES.

- | | | |
|--------------------------------|-------------------------------------|--------------------------------|
| 28 Autumn Bough. | 41 Holland Pippin. | 55 Porter. |
| 29 Autumn, or Late Strawberry, | 42 Jewett's Red. | 56 President. |
| 30 Autumnal Swaar. | 43 Lindley's Nonpareil (South-ern). | 57 Princeall. |
| 31 Beauty of the West. | 44 Lowell. | 58 Pumpkin Russet (Sweet R't.) |
| 32 Belle et Bonne. | 45 Lyscom. | 59 Rambo. |
| 33 Belle d'Aout, 50 cts. | 46 Maiden's Blush. | 60 Republican Pippin. |
| 34 Boxford. | 47 Monstrous Bellflower. | 61 St. Lawrence. |
| 35 Cooper (Ohio). | 48 Nyack Pippin. | 62 Sweeting, Haskell. |
| 36 Doctor, or De Witt. | 49 Orne's Early. | 63 Sweeting, Jersey. |
| 37 Drap d'Or. | 50 Pearmain, Autumn. | 64 Sweeting, Lyman's Pumpkin. |
| <i>Orange Pippin.</i> | 51 Pearmain, Gardener's Sweet. | 65 Sweeting, Peachpond. |
| 38 Fall Pippin. | 52 Pearmain, Scarlet. | 66 Sweeting, Sawyer. |
| <i>Summer Pippin.</i> | 53 Pineapple Russet. | 67 Sweeting, Spice. |
| 39 Gravenstein. | 54 Pomme royale, <i>Dyer.</i> | 68 Sweeting, Superb. |
| 40 Hawley—Dowse. | <i>Tompkins—Beard Burdin.</i> | 69 Sweeting, Tift's. |

WINTER VARIETIES.

- | | | |
|--|--|--|
| 70 Aunt Hannah. | 108 Ortle, <i>Jersey Greening.</i> | 135 Rawle's Jannet. |
| 71 Bailey Sweet. | <i>Woolman's Long.</i> | 136 Reinette de Caux, 50 cts. |
| 72 Baldwin. | 109 Pearmain, Blue. | 137 Reinette, Canada. |
| 73 Bellefeur, White. | 110 Pearmain, Claygate, 50 cents. | 138 Rhode Island Greening. |
| 74 Bellefeur, Yellow. | 111 Pearmain, Herefordshire (<i>true.</i>) | 139 Roman Stem. |
| *75 Bellefeur, Brabant, <i>crooked growth.</i> | 112 Pearmain, Sweet. | 140 Rome Beauty (Ohio.) |
| 76 Belmont. | 113 Pearmain, Winter. | 141 Russet, Boston or Roxbury. |
| 77 Bourassa. | 114 <i>Peck's Pleasant, fine variety of Newtown Pippin.</i> | 142 Russet, English (Downing.) |
| 78 Broadwell. | 115 Pennington Seedling. | 143 Russet, Golden. |
| 79 Carthouse, <i>Gilpin.</i> | 116 Pickman (Pippin.) | 144 Russett, Honey. |
| <i>Red Romanite, of Ohio.</i> | 117 Pippin, American Golden. | 145 Russet, Imperial, <i>monstrous.</i> |
| 80 Chandler. | 118 Pippin, Bullock's. | 146 Scarlet Nonpareil. |
| 81 Cogswell. | <i>American Golden Russet.</i> | 147 Seeknofurther, Green. |
| 82 Cumberland Spice. | 119 Pippin, Cranberry. | 148 Seeknofurther, White. |
| 83 Dickskill. | 120 Pippin, Easter. | 149 Seeknofurther, Westfield. |
| 84 Domine. | <i>French Crab.</i> | 150 Spitzemberg, Esopus. |
| 85 Downton Nonpareil. | 121 Pippin, Michael Henry. | 151 Spitzemberg, Flushing. |
| 86 Dutch Mignonne. | 122 Pippin, Monmouth. | 152 Spitzemberg, Newtown. |
| 87 Eustis, or Ben. | 123 Pippin, Newark, <i>crooked growth.</i> | 153 Spitzemberg, Springhill, <i>new variety of Esopus Spitzemberg, 50 cts.</i> |
| 88 Fallawater. | 124 Pippin, Green Newtown (rough bark.) | 154 Swaar. |
| 89 Fameuse, or De Neige. | 125 Pippin, Yellow Newtown (smooth bark.) | 155 Sweet Baldwin. |
| 90 Fort Miami. | 126 Pippin, Red Sweet. | 156 Sweeting, Danvers Winter. |
| 91 Golden Ball. | 127 Pippin, Ribston. | 157 Sweeting, Green. |
| 92 Gooseberry, 50 cts. | 128 Pippin, Springhill, <i>fine variety of Newtown pippin, 50 cents.</i> | 158 Sweeting, Hartford. |
| 93 Hubbardstone Nonesuch. | 129 Pippin, Sturmer. | 159 Sweeting, Phillip's. |
| 94 Jonathan. | 130 Pomme de Lettre (keeps a year), 50 cts. | 160 Sweeting, Lovett's. |
| 95 King (<i>Tompkins County.</i>) | 131 Pomme Grise. | 161 Sweeting, Ramsdell's. |
| 96 Lady—Pomme d'Api. | 132 Pound Royal. | 162 Sweeting, Seaver. |
| 97 Maclean's Favorite. | 133 Prince's Yellow Winter, 50 cts. | 163 Sweeting, Tallman. |
| 98 Marston's Red Winter. | 134 Pryor's Red. | 164 Sweeting, Wells. |
| 99 McLellan. | | 165 Tewksbury Blush. |
| 100 Melon. | | 166 Twenty Ounce. |
| 101 Middle Apple, <i>extra fine.</i> | | 167 Vanderveer. |
| 102 Minister. | | 168 Victuals and Drink. |
| 103 Mother. | | 169 Wagener. |
| 104 Murphy. | | 170 Wine. |
| 105 Newark King. | | 171 Winesap. |
| 106 Northern Spy. | | 172 Winter Strawberry (English.) |
| 107 Old Nonsuch. | | |
| <i>Red Canada.</i> | | |

FOR PRESERVES AND ORNAMENT, 37 cts., except those noted.

- | | | |
|---|---|---|
| 173 Api étoilé, or Starry Lady Apple, 50 cts. | 178 Siberian Yellow Crab. | 183 Chinese Double White Flowering, 50 cts. |
| 174 Golden Beauty Crab, 50 cts. | 179 Large Yellow Crab. | 184 Rivers' Double Flowering, 50 cts. |
| 175 Montreal Beauty Crab, 50 cts. | 180 Power's Siberian Crab. | 185 Prince's Roseate Double Flowering, <i>new</i> , 50 cts. |
| 176 Siberian Large Red Crab. | 181 Transcendent Crab, finest of all, 50 cts. | N. B.—Cherry Crab is worthless. |
| 177 Siberian Small Red Crab. | 182 Chinese Double Red Flowering. | |

OTHER VARIETIES OF APPLES.

Less known, which can be supplied.

186 Ashmead's Kernel.	202 Leland Pippin.	217 President.
187 Beverly red.	203 Lincoln.	218 Princess Royal.
188 Borovitsky.	204 Longstem,	219 Reinette Saffran.
189 Borsdorffer.	205 Maryland Ladies' Blush.	220 Reinette, Seedless.
190 Canahan.	206 Menagere.	221 Reinette Van Mons.
191 Cardinal, Red.	207 Monamet Sweet.	222 Roseau.
192 Cole, Scarlet perfume.	208 Moore's Sweeting.	223 Schoonmaker.

SELECT APPLES.

CLASS I.—SUMMER APPLES.

Benoni, medium size, roundish, deep red, striped, flesh yellow, tender, subacid, rich flavor, good bearer. Aug.

Blinkbonny, medium size, oblate, pale straw color, acid, spicy, the finest flavored of all early apples, productive, a great acquisition. Aug.

Corse's Favorite, medium, oblate, pale yellowish green, tender, very sprightly, subacid flavor, excellent for cooking, very productive, ripens gradually through August. A favorite fruit of Lower Canada.

Early Harvest, medium size, roundish oblate, pale yellow, tender, acid, rich, fine, ripens in succession, of slow growth, with slender shoots, but very productive. End of July and Aug.

Early Joe, rather small, oblate, deep red, tender, subacid, spicy, excellent, very productive. Last of Aug.

Early Strawberry, rather small, roundish, deep red, faint stripes, tender, subacid, pleasant, productive. Middle to end of Aug.

Garretson's Early, rather large, roundish oblate, yellow, tender, subacid, rich, excellent, productive, a great acquisition. Aug.

Golden Sweeting, large, roundish, pale yellow, sweet, good, fair, vigorous, productive. Late in Aug.

Keswick Codlin, rather large, conical, pale yellow, pleasant acid, juicy, good, excellent for cooking, very productive. Late in Aug.

Large Yellow Bough, or Early Bough, large, roundish, greenish yellow, sweet, very tender, excellent flavor, regularly productive. Aug.

Lyman's Large Summer, large, roundish, pale yellow, subacid, high flavor; a moderate bearer until the tree becomes large. Aug.

Primate, medium size, pale yellow, with a blush, tender, mild and good flavor, vigorous, productive. Aug. and Sept.

Red Astrachan, large, roundish oblate, bright crimson, beautiful, crisp, acid, juicy, good; vigorous, productive. Aug.

Sinequanon, medium size, greenish pale yellow, tender, spicy, high flavored, excellent, grows slow and slender, productive. Aug.

Summer Pearmain, American, medium size, oblong, striped and dotted with red, tender, subacid, high flavored, excellent, ripening for several weeks; growth slow, very productive. Throughout August.

Summer Queen, rather large, conical, yellow striped with red, handsome, flesh yellow, sub-

acid, rich, spicy, fine flavor, fine for cooking, vigorous growth. Aug.

Summer Rose, medium size, roundish oblate, yellowish blotched with red, very tender, crisp, juicy, mild subacid, excellent; grows rather slow, productive. Middle to end of Aug.

Williams' Favorite, medium size, oblong, crimson striped, mild, agreeable, moderately juicy, excellent, handsome, of moderate growth, productive. Ripens in succession during Aug.

CLASS II.—AUTUMN APPLES.

Autumn, or Late Strawberry, medium size, roundish, tender, juicy, agreeable subacid flavor, estimable, vigorous, and productive. Sept., Oct., and Nov.

Autumn Bough, medium or rather large, roundish, whitish, sweet, pleasant flavor, much esteemed, very productive. Sept.

Cooper (of Ohio), rather large, round oblate, greenish yellow, striped with red, crisp, juicy, pleasant, not high flavor, productive, much esteemed in Ohio. Midautumn.

Drap d'or, or Orange Pippin, large, roundish, golden yellow, showy, mild subacid, agreeable, moderately vigorous, productive. Sept. and Oct.

Fall Pippin, very large, roundish, rich yellow when ripe, flesh yellowish, rather firm, tender at maturity, rich, aromatic, excellent, vigorous, productive, greatly esteemed. Oct. to Dec.

Famense, or De Neige, medium size, round, red, flesh very white, subacid, juicy, spicy, pleasant, much esteemed at the North, vigorous. Oct. and Nov.

Graveinstein, rather large, roundish, yellow striped red, tender, juicy, subacid, rich, high flavored, excellent, handsome, vigorous, very productive, well suited to the North. Sept. and Oct.

Hawley, or Dowse, quite large, roundish, pale yellow, tender, fine grained, mild, rich fine subacid flavor, very valuable, rather slow growth, productive. Midautumn.

Holland Pippin; this is not the Summer Pippin as is erroneously stated in some Catalogues, but is an autumnal fruit totally distinct; very large, roundish, somewhat oblong, pale yellow, dull red cheek, flesh white, rather acid, secondary flavor, vigorous growth. Oct. and Nov.

Jersey Sweeting, medium size, round ovate, greenish yellow, striped with red, tender, juicy, very sweet, popular for table and cooking, vigorous, and productive. Sept. and Oct.

Jewett's Red, medium size, roundish, yellow, striped red, very tender, mild acid, aromatic, fine grained, excellent, vigorous, productive, suitable for the North. Oct. and Nov.

Lowell, or Orange, large, roundish oblong, fair, rich yellow, rather coarse, rich acid, excellent, vigorous, productive, and early bearer. Sept.

Lyscom, large, round, pale red stripes on yellowish ground, fine grained, mild subacid, moderately rich flavor, good second rate. Oct. and Nov.

Maiden's Blush, rather large, oblate, regular form, fair, pale yellow, red shaded cheek, beautiful, tender, pleasant subacid, good second rate, very productive. Midautumn.

Porter, rather large, oblong conical, bright yellow, fair, tender, rich subacid, fine flavor, a good Northern fruit, productive. Sept.

Pomme Royale, Dyer, or Tompkins, rather large, roundish, pale yellow, tender, very fine grained, very juicy, rich acid flavor, excellent, equaled by few, productive. Sept., Oct., and Nov.

Pumpkin Russet, or Sweet Russet, very large, round, slightly flattened, yellowish green russet, sweet, rich flavor, esteemed, vigorous growth. Oct. and Nov.

Rambo, medium, oblate, streaked and marbled yellow and red, tender, mild subacid, rich, juicy, fine flavor, vigorous growth, productive, much esteemed everywhere, Oct. to Dec. at the North, but autumnal at the South.

Spice Sweet, large, pale yellow, with a blush, handsome, sweet, tender, fine flavor, productive. Sept. There is an inferior variety known under the same name.

St. Lawrence, large, roundish, dark red stripes on greenish yellow, rather acid, somewhat rich, agreeable, handsome, productive, a popular Canadian fruit. Midautumn.

CLASS III.—WINTER APPLES.

Bailey Sweet, large, ovate, bright red, beautiful, tender, mild, rich sweet, excellent, vigorous, upright growth. Nov. to Jan.

Baldwin, large, roundish, bright red striped and shaded on yellow ground, crisp, mild, rich subacid flavor, handsome, vigorous and rapid upright growth, very productive. A first rate winter-keeping apple, and very suitable in connection with the Newtown Pippin for exportation; ripens throughout the winter.

Blue Pearmain, large, roundish, with dull purplish red stripes, a conspicuous bloom, flesh yellowish, mild, subacid, good; of slow growth, and produces only a thin crop. Oct. to Jan. The Flushing Spitzemberg much resembles it, and is a much more valuable variety.

Bourassa, rather large, ovate, dark orange russet, subacid, fine grained, rich, fine flavor, highly esteemed in Lower Canada, and in our most Northern States. Oct. to Mar.

Belmont, or Gate, rather large, ovate, pale yellow with a blush, flesh firm, crisp, becomes tender, mild, rich, subacid, fine flavor, very productive, highly valued in some of the Western States. Dec. and Jan.

Claygate Pearmain, medium size, ovate, yellowish striped with red, flesh subacid, juicy, sprightly, fine flavor, first quality for the desert. Nov. to Mar.

Danvers Winter Sweet, medium size, roundish, yellow with sometimes a blush, flesh yellow, sweet, rich, tender, vigorous, and productive. Nov. to Mar.

Dutch Mignonne, quite large, roundish, orange with faint stripes, beautiful, firm flesh, becomes tender, rich, subacid, high flavor, rather coarse, growth erect, productive. Nov. to Mar.

Gooseberry, large, roundish oblate, yellow, sprightly, acid, peculiar flavor, first quality, a favorite London cooking fruit. Jan. to May.

Green Sweeting, medium size, roundish, fair, greenish, very sweet, tender, spicy flavor, productive, and a long keeper, growth moderate. Nov. to May.

Hubbardston Nonsuch, large, roundish ovate, yellow ground striped and dotted with light red, flesh yellow, tender, juicy, very rich, slightly subacid, blended with a rich, sweet, and excellent flavor, superior to the Baldwin in flavor, vigorous growth, very productive. Nov. to Jan.

Jonathau, Medium size, round ovate, striped with bright red on yellow, very juicy, subacid, spicy, moderately rich, always fair and handsome, assimilating to the Spitzenberg character, shoots slender and divergent, very productive, Nov. to April.

Laquier, rather large, oblate, striped red on greenish yellow, flesh fine grained, firm, crisp, agreeable, mild subacid. Dec. to March.

Lady Apple, or Pomme d'Api, Quite small, flat, uniform, brilliant deep red cheek on light yellow, flesh tender, crisp, juicy, mild, slight subacid, good flavor, a beautiful fancy apple for parties, commands twice the price of any other apple; growth vigorous but not rapid, forms a beautiful regular conical tree with luxuriant foliage, some trees near Flushing have attained the height of 50 feet, each yielding 9 to 11 Barrels. There is no variety of apples, large or small, that produces greater crops. Nov. to May.

Melon (Nortons), large, roundish, pale yellow with bright-red stripes and dots, flesh white, tender, subacid, spicy, very juicy, fine flavored, an excellent and beautiful fruit, of slow growth, productive. Nov. to Feb.

Minister, large oblong conical, striped red on pale yellow, flesh yellowish, subacid, moderately rich, second rate, fair and showy, vigorous growth, very productive. Nov. to Jan.

Monmouth Pippin, rather large, yellow with a bright red cheek, tender, juicy, fine flavor, vigorous and productive, a very estimable winter fruit. Dec. to April.

Mother, large ovate, rich red, flesh yellow, mild subacid and mixed with sweet, rich, very aromatic, somewhat juicy, very productive. It is well suited to the North. Nov. to Jan.

Northern Spy, large, roundish oblate, often flattened, red striped, dark crimson on the sun side with a delicate bloom, beautiful, flesh juicy, rich, highly aromatic and retains its freshness of flavor until late in the Spring, a highly estimable fruit and suitable for exportation; growth very vigorous and erect, very productive. Leaves and fruit buds open late, thereby rendering it very suitable to the North. Dec. to June.

Old Nonpareil (often called Red Canada), medium size, roundish conical, red dotted with white, flesh firm, fine grained, rich subacid, high, excellent flavor, much esteemed, growth rather slender, with a moderate crop. Nov. to May.

Pearmain, Herefordshire, We do not believe that more than one Nursery besides our own in the whole Union possesses this genuine variety; and that one obtained it from us. They all appear to have confused the common Winter Pearmain with this; and even Mr. J. J. Thomas, whom we deem a generally reliable author on Apples, has fallen into the same error. It is a much larger fruit than the Winter Pearmain, form oblong ovate, with dull red stripes on a pale greenish ground, flesh pleasant, sprightly acid, aromatic, juicy, tender, fine grained, high and pleasant flavor, will keep a month longer than the other variety, and is much the most valuable, productive. Nov. to March.

Peck's Pleasant, large, roundish, fair, pale yellow, with a brown cheek, flesh firm, very tender, mild, rich, clear subacid, fine Newtown Pippin flavor, a very estimable variety. Nov. to April.

Pennington's Seedling, medium size, oblate, yellowish russet, flesh yellow, firm, crisp, brisk acid, high flavored, excellent, first quality. Dec. to March.

Pippin, Green Newtown, full medium and occasionally large, roundish oblate or flattened, dull green, becoming yellowish green, often dotted, with a brownish red cheek, flesh white, firm, crisp, fine grained, juicy, with a high aromatic flavor, unsurpassed in excellence, keeps long and preserves its freshness; growth rather slow, but quite equal to many other varieties, *rough bark* after the second year's growth. Immense quantities are grown on Long Island, and on the Hudson river, and it will doubtless succeed in any Apple region, on good free soil, with proper culture. Quantities of the finest fruit come from Western New-York. Nurserymen have prejudiced purchasers against this tree, because its slower growth renders it less profitable to them than the rapid growing varieties.

Pippin, Yellow Newtown. Scarcely any Nursery on this Island or elsewhere in the State possesses this very distinct and genuine variety; but many cultivate and sell the preceding under the two distinct names of green and yellow, and they have thereby caused the confusion as to identity. It is found disseminated in orchards to which we have supplied the true variety during the last 60 years. A blind man can distinguish this tree from the preceding one by its *perfectly smooth bark*. The fruit is rather large, more flattened than the preceding, clear light yellow, with a bright red cheek, fairer and handsomer, possessing the same qualities, but not quite equal in flavor, keeps during the same period, and is

also suitable for exportation. The tree has a more thrifty appearance and grows faster than the preceding.

Pippin, Ribston, medium or rather large, roundish, yellow and red, flesh yellow, crisp, juicy very rich, sprightly acid flavor, productive. Succeeds well in the most northern localities, where it is a winter fruit, but it matures here in Oct. and Nov. and is also valueless.

Pippin, Springhill, a seedling of the Green Newtown Pippin, grown by Judge B. W. Strong, seems identical in character with the parent, and of equal excellence. It may prove of more thrifty growth.

Pippin, Sturmer, medium, conical, greenish yellow, sprightly acid, high flavor, excellent, first quality, one of the best late apples for dessert and cooking, very productive. Dec. to June.

Pomme Grise, small, roundish, gray russet, very tender, fine grained, rich, high flavor, good for dessert and cooking; the tree productive, well suited to the North, and a favorite in Canada. It is an old European variety.

Prince's Yellow Winter, medium, or rather large, roundish oblate, pale yellow, tender, juicy, fine flavor, a very estimable variety. Nov. to April.

Rawles Jannet (Neverfail), medium size, roundish, conical, striped pale red on light yellow, firm, crisp, juicy, rich, mild subacid, fine grained, first quality, slow growth, very productive. Keeps very long, and is highly esteemed at the South and Southwest.

Reinette, Canada, quite large, flattened, greenish yellow, often a brown cheek, flesh firm, becomes tender, juicy, rich, sprightly subacid, vigorous growth, productive. It is a French variety, and succeeds well in Canada. Nov. to Mar.

Rhode Island Greening, large, roundish oblate, greenish yellow, fair and handsome, with a dull bluish cheek, flesh yellow, subacid, tender, juicy, very pleasant, excellent for table and cooking; strong oblique growth, spreading, very productive; a most valuable market fruit. Nov. to Mar. at the North, but a fall apple at the South.

Rome Beauty (of Ohio), very large, beautiful, roundish, bright red on pale yellow ground, flesh yellow, crisp, mild, subacid, juicy. Oct. to Dec.

Russet, Boston, or Roxbury, rather large, roundish oblate, rough russet on yellowish ground, often a dull brown cheek, flesh coarse, rather crisp, good subacid, not high flavor; growth vigorous and spreading, very productive. Nov. to June.

Russet, Pine Apple, large, roundish, ovate, yellowish covered with russet, flesh yellow, crisp, subacid, tender, juicy, aromatic, exceedingly rich, first quality. Oct. and Nov.

Russet, Poughkeepsie, erroneously called by some "English Russet," small, roundish, ovate, brownish russet, flesh firm, subacid, aromatic flavor; very productive, and keeps till July or longer. It is probably of foreign origin, but very distinct from and much smaller than the following.

Russet, English Golden, this appears to be the "English Russet," as described and figured by Downing, medium size, roundish oblate, yellowish russet, fair and handsome, flesh firm, crisp, tender, rich, aromatic, juicy, estimable, growth vigorous, productive. Nov. to Mar.

Seeknofurther, Westfield, medium to large, roundish, fair, striped with dull red, partially russeted, flesh tender, spicy, rich, fine flavor, growth vigorous, productive. Succeeds well at the North and in Ohio. Nov. to Feb.

Seeknofurther, White, medium size, roundish oblate, greenish yellow, flesh fine grained, subacid, juicy, very agreeable flavor. Nov. to Mar.

Spitzberg, Esopus, rather large, ovate, bright red, flesh yellow, firm, crisp, very aromatic, rich, subacid, unequaled in high flavor; growth slow, rather slender, moderate bearer, esteemed among the very best. Nov. to Mar.

Spitzberg, Flushing, large, round, conical, dark red, with white dots, and a thin bloom, flesh white, nearly sweet, aromatic, pleasant, good second-rate flavor, growth very vigorous, dense luxuriant foliage, moderately productive. Nov. to April.

Spitzberg, Springhill, a beautiful seedling of Esopus Spitzberg grown by Judge B. W. Strong, medium size, ovate, bright red, flesh subacid, aromatic, rich flavor, estimable. Nov. to Mar.

Swaar, rather large, roundish, often oblate, pale lemon yellow, flesh yellowish, firm, fine grained, tender, spicy, slight subacid, mild, very rich, esteemed one of the best, growth moderate, very productive. Nov. to May.

Talman Sweeting, medium size, roundish oblate, whitish yellow, flesh white, firm, very sweet, secondary flavor for dessert, excellent for cooking; growth vigorous, very productive. Nov. to April.

Tewksbury Blush, small, round oblate, yellow with red cheek, flesh yellow, firm, juicy, good flavor, vigorous growth, very productive, keeps till July. It requires a long season to mature, and is therefore best suited to the South.

Twenty Ounce, very large, fair, and very beautiful, roundish oblate, striped rich red on yellowish ground, a monstrous Pearmain variety, flesh rather coarse, subacid, assimilating in flavor to the winter Pearmain, second rate, excellent for cooking, growth upright, productive. Popular at market, Oct. to Jan.

Vanderveer, usually misspelt "Vandervere," medium size, round oblate, pale red stripes on yellow ground, deep red on sunside, flesh light yellow, mild, subacid, rich, excellent flavor, growth fair, good bearer, does best on light soils. Oct. to Mar.

Wagener, medium to large, oblate, yellow striped pale red, deep red on sunside, flesh yellowish, aromatic, excellent, very productive. Dec. to May.

Winter Pearmain, medium or under, ovate, ends flattened, stripes of dull red on pale yellow, flesh dull yellow, very tender, subacid, aromatic, very pleasant, high flavored, growth moderate, very productive. An old and universal favorite. Nov. to Mar.

Yellow Bellflower, or Belle fleur, large, often very large, oblong ovate, yellow, with a bluish cheek, flesh fine grained, very tender, subacid, crisp, juicy, sprightly aromatic, excellent, a splendid and favorite fruit, growth vigorous, very productive. Well adapted to the Northern and Middle States, and as far west as Kentucky. Nov. to April.

PEARS—PYRUS COMMUNIS.

Note.—There is never any *Pear Blight* or *Sap Blight* on Long Island, and the Trees are never injured by the winter.

The stock of Pears is the finest in the Union, and the prices low for the quality, and we can supply the leading and most esteemed varieties on both Pear and Quince. Such as do not succeed on the Pear we can supply on the Quince, and contrarywise.

Standards on Seedling Pear stocks, 3 to 4 years budded,	50 cts.
Do. do. extra size, 4 to 6 years,	75 cts. to \$1 50
Do. do. largest size, 8 years bearing age,	2 00
Pyramids and Dwarfs on Anger's Quince, 2 to 3 years,	50 cts.
Do. do. do. 4 to 8 years, in full bearing,	75 cts. to \$1 50,
according to age and size.	

Secondary sized Trees to those priced at 50 cts. will be supplied at 37½ cts.

☞ The Extra Large-sized Trees are such as are seldom to be had, and are often sold at \$5 to \$5 each.

N. B.—The American Varieties are denoted by an asterisk, *.

SUMMER VARIETIES.

1 Amir Joannet.	14 Elizabeth (Manning)	29 *Queen of August (<i>extra</i>),
2 Bartlett.	15 Fondante agréable.	\$1.
3 Beau present d'Artois.	16 *Heatheot.	30 Rhenish Colmar, <i>very spicy</i> ,
4 Beurre Benoist.	17 *Henrietta (Edwards.)	\$1.
5 Beurre Giffard.	18 Hessel, <i>very good</i> .	31 Rostiezer.
6 *Bloodgood (<i>slow growth</i> .)	19 Honey, European.	32 Rousselet hatif.
7 *Brandywine.	20 *Hosen Schenk,	33 Rousselet de Rheims.
8 *Canadagua (Catharine.)	21 Jargonelle, English.	34 Souverain d'été.
9 Colmar d'été.	22 *Kinsgessing.	35 Sugartop.
<i>Summer Colmar.</i>		
10 *Dearborn's Seedling (<i>slow growth</i> .)	23 Madeleine.	36 Summer Francreal.
11 Diller.	24 *Moyamensing.	37 Summer melting.

Chancellor

CLASS I.—SUMMER PEARS.

Amiré Joannet, small, obovate, yellow, reddish cheek, rather juicy, becomes dry, pleasant, moderate flavor, tree very productive, valued principally for its earliness. The Sugar top is the variety that next follows it in maturity.

Bartlett, large, pyriform, clear yellow, often a blush, fine grained, very tender and buttery, sweet with a slight subacid, perfumed, moderately rich flavor, a splendid fruit, tree bears young, very productive, commands the highest market price.

Beau Present d'Artois, rather large, half melting, very juicy, fine flavor, first quality, tree vigorous and very productive. A new and highly esteemed variety.

Beurre Benoist, medium, melting, slightly perfumed, agreeable flavor, first quality, tree vigorous and productive.

Beurre Giffard, medium, melting, juicy, pleasant flavor, greatly esteemed, tree very productive, fruit larger than the Madeleine, and equal good.

Bloodgood, medium, obovate, yellow, russetty, buttery, sweet, rich aromatic flavor, rather slow growth, moderate crop.

Brandywine, medium, pyriform, yellowish green, melting, very juicy, fine flavor, tree very productive.

Canadaigna, has erroneously been called *Catharine*, very much resembles the Bartlett, but not quite as large or as good; tree vigorous and very productive, the fruit ripens at same period as the Bartlett.

Dearborn's Seedling, small, turbinate, clear yellow, fine grained, melting, juicy, fine flavor, but has been unduly extolled, when its size and quality are contrasted with others; tree of slow growth, bears young.

Doyenne d'été, small, obovate, yellow, bright red cheek, melting, juicy, sweet, pleasant, not high flavor, tree bears very young.

European Honey, medium or under, roundish, yellow, sweet, good flavor, tree productive.

Heathcot, medium, obovate, pale whitish yellow, russetty, fine grained, very buttery, perfumed, excellent flavor, tree very hardy, and very productive.

Hessel, medium, obovate, yellowish green, melting, juicy, very pleasant flavor, tree vigorous, very productive, estimable.

Jargonelle, English, rather large, long pyriform, greenish yellow, brownish cheek, juicy, pleasant subacid, moderate flavor, very productive, valuable for market.

Kingsessing, rather large, obovate, green shaded, buttery, delicate, rich flavor.

Madeleine, medium, obovate, yellowish green, melting, very juicy, slight acid, delicate, agreeable refreshing flavor vigorous growth, very productive; one of the best early Pears.

Moyamensing, rather large but variable, obovate pale yellow, buttery, melting, good flavor, productive.

Muscadine, medium, obovate, yellowish green, buttery, melting, somewhat coarse and astringent, rather rich, good flavor.

Osband's Summer, medium or under, obovate, yellow, reddish cheek, sweet, mild, and excellent flavor, one of the finest early Pears.

Queen of August, large, roundish ovate, very fair, pale yellow, tender, melting, very juicy, pleasant flavor, excellent, tree very vigorous. A new and very valuable seedling variety, originated by ourselves, the largest of early pears, ripe during the last half of August.

Rostiezer, rather small, sometimes medium, pyriform, brownish green, reddish cheek, melting, juicy, sweet, very high perfumed flavor, of great excellence, one of the finest late summer pears.

Summer Francreal, medium, obovate, yellowish green, sometimes a blush, fine grained, buttery, melting, rich and excellent, much esteemed; tree thrifty, very productive.

Tyson, medium, pyriform, bright yellow, reddish cheek, fine texture, buttery, very melting and juicy, nearly sweet, perfumed, high and excellent flavor, tree vigorous, very productive.

Williams's Early, rather small, roundish, bright yellow, half buttery, juicy, somewhat musky, rich flavor, handsome.

CLASS II.—AUTUMN PEARS.

Ananas, or Henry IV., medium, obovate, greenish yellow, melting, juicy, rich, perfumed, mostly first rate in flavor, tree vigorous, very productive.

Andrews, medium, pyriform, fair, yellowish green, reddish cheek, very juicy, melting, very agreeable flavor, very productive.

Angleterre, medium, pyriform, light green dotted over with russet, brownish cheek, buttery, melting, juicy, secondary flavor, very productive. Sold in great quantities in the markets of Paris.

Beurre Bose, rather large, pyriform, deep yellow, buttery, juicy, sweet, perfumed, excellent; growth slow, fair crop.

Beurré, Brown, large, oblong obovate, yellowish green, russeted, very juicy, melting, buttery, rich subacid vinous flavor; much esteemed, growth slow and flexuose, and requires high cultivation.

Beurré d'Amanlis, large, obovate, yellowish green, some russet, reddish cheek, buttery, melting, juicy, rather rich, good, not high flavor, growth vigorous, productive.

Beurré d'Amanlis panaché, fruit similar in quality to the preceding, but both the wood and the fruit singularly striped with red and yellow.

Beurré d'Anjou, rather large, obovate, greenish yellow, somewhat russeted, red cheek, fine grained, buttery, melting, rich, vinous, delicious flavor.

Beurré Capiamont, medium, obovate, yellow, red cheek, buttery, melting, sweet, often astringent, second rate, tree hardy, vigorous, productive.

Beurré Diel, very large and splendid, obtuse pyriform, dull yellow, some russet, buttery, juicy, rich, firm flavor, vigorous growth, productive, and on the Quince often weighs a pound.

Beurré, Golden Bilboa, medium, obovate, fine yellow, some russet, fine grained, very buttery, melting, moderately rich, sometimes a slight acid astringency, not high flavor, productive.

Beurré Goubault, medium, roundish, juicy, melting, sweet, fine flavor, estimable, tree very vigorous, and productive.

Beurré Langelier, large and handsome, juicy, melting, high flavor, excellent, first quality, tree vigorous and productive.

Beurré Superfin, large, handsome, buttery, melting, high flavor, very excellent, one of the finest varieties, tree vigorous and productive.

Bonne d'Ezee, large and beautiful, yellow and red, buttery, melting, perfumed, first quality, greatly esteemed, productive.

Bergamotte Buffo, or Beurrré Crapaud, medium, yellow, red cheek, fine grained, melting, juicy, perfumed, high flavored, excellent, much resembles white Doyenné.

Bergamotte Cadette, or Beurrré Beauchamps, medium, roundish obovate, greenish yellow, often russeted, with reddish brown cheek, buttery, melting, sweet, quite rich, slightly perfumed, excellent, productive, highly esteemed.

Bergamotte, Gansels, medium, rather large, roundish, oblate, yellowish brown, faint brownish blush, melting, juicy, sweet perfume, rich, first rate flavor, highly esteemed.

Beurré Van Marum, medium, or rather large, pyriform, yellow, juicy, melting, sweet, very agreeable flavor, estimable, tree productive, and soon in bearing.

Bezi de Montigny, medium, obovate, yellowish green, half buttery, melting, juicy, sweet, perfumed, good flavor.

Buffum, a seedling of the white Doyenné, medium, fair, obovate, yellow, reddish cheek, somewhat russeted, buttery, sweet, good flavor, tree very vigorous, produces great and regular crops.

Compte de Lamy, medium, roundish, yellow, brownish blush cheek, fine grained, buttery, melting, rich, high flavor, esteemed.

De Louvain, distinct from Beurrré de Louvain, which is a baking pear, medium, obovate, light yellow, somewhat russeted with reddish dots, buttery, melting, rich, fine flavor, an estimable variety.

Delices d'Hardempont (of Belgium), medium, pyriform, pale yellow, buttery, melting, rich, excellent flavor, much esteemed.

Dix, large, pyriform, deep yellow, sweet, juicy, rich, excellent, sometimes rather acid, valuable, but tardy in bearing.

Doyenne Boussoeh, large and showy, thick obovate, lemon yellow, somewhat russeted, often a reddish cheek, buttery, melting, very juicy, first rate flavor.

Doyenne, Gray, medium, obovate, cinnamon russet, very buttery, melting, rich, perfumed,

delicious flavor, much esteemed, very productive.

Doyenne Sielle, medium, roundish obtuse, pale yellow, slight blush, fine grained, buttery, rich, excellent flavor, tree vigorous, productive.

Doyenne, White. This is the Virgalieu of the New York markets, and the Butter Pear of Philadelphia. Medium, or rather large, obovate, fine grained, buttery, melting, juicy, rich, excellent flavor, none more highly esteemed, and commands the highest price; tree of vigorous growth, and produces great crops on standard trees in the interior of this State, and on the Quince it yields well everywhere. The Striped Doyenne is valueless.

Duchesse d'Angouleme, very large, often weighing a pound or more, obovate, greenish yellow, rather coarse, buttery, juicy, very good on Quince, worthless on the Pear stock.

Dunmore, large, oblong obovate, greenish with brownish russet dots, buttery, melting, perfumed, rich, fine flavor, growth vigorous, productive.

Flemish Beauty, large and splendid, always fair, obovate, reddish brown russet on pale yellow ground, juicy, melting, usually very rich, sweet, and excellent flavor, but variable, and sometimes not high flavored, a very valuable fruit, tree vigorous, productive.

Fondante d'Automne, or Belle Luerative, medium, obovate, yellowish green, slightly russeted, fine grained, very juicy, melting, rich, perfumed, excellent, one of the finest of Pears, tree vigorous, very productive, and comes soon into bearing.

Forelle, or Trout Pear, medium, pyriform, clear yellow, deep vermilion cheek, buttery, melting, agreeable, second rate, a beautiful fruit.

Fondante Charnesse, or Waterloo, large, beautiful, pyramidal, melting, juicy, high flavor, excellent, much esteemed, tree vigorous and productive.

Frederick of Wurtemberg, large and beautiful, short pyriform, yellow, brilliant red cheek, very melting, buttery, juicy, variable in quality, sometimes delicious, often inferior, tree very vigorous, productive, a beautiful market fruit.

Fulton, nearly medium, roundish oblate, dark cinnamon russet, half buttery, melting, sprightly, agreeable rich flavor, estimable, tree vigorous, produces large and regular crops.

Jalousie de Fontenay, medium, thick pyriform, yellowish green, somewhat russeted, often faint red cheek, buttery, melting, mild, rich, fine flavor, estimable.

Louise Bonne of Jersey, large, pyriform, yellowish green, dull red cheek, very juicy, buttery, rich, faintly subacid, fine flavor, tree vigorous, very productive, succeeds admirably on Quince, and is relied on for its great crops, and as a favorite market fruit.

Long Green—Verte Longne, medium, long pyriform, very juicy, agreeable, good flavor, productive.

Marie Louise, very crooked and irregular growth, fruit large, pyriform, yellowish, somewhat russeted, buttery, melting, vinous, rich, fine flavor, but variable, and often 2d or 3d rate. Requires high cultivation to perfect the fruit.

Napoleon, medium, pyriform, yellowish green, extremely juicy, melting, moderately rich, good flavor, sometimes astringent, tree hardy, thrifty, very productive.

Nouveau Poiteau, above medium, obovate, pale green, with a few blotches of russet, fine grained, melting, juicy, rich aroma, excellent, very highly esteemed, tree vigorous and bears promptly and abundantly.

Onondaga, or Swan's Orange, very large and splendid, obtuse oval, rich yellow, often brown cheek, slightly coarse, buttery, melting, rich, high flavor, estimable but not first quality, vigorous growth, productive.

Oswego Beurré, medium, obovate, yellowish green, melting, juicy, fine sprightly vinous flavor at first, then becoming nearly sweet, tree very hardy and vigorous, and greatly productive, an estimable and reliable variety.

Paradise d'Automne, rather large, pyriform, deep yellow, same appearance and qualities as the Beurré Bosc, more melting and sprightly, and the growth more vigorous, which gives it a decided preference.

Plongastel, large, pyriform, greenish yellow, russeted crown, rather coarse, half melting, juicy, rich, good but not high flavor, about equal to the Bartlett.

Seckel, a tree of slow, compact growth, fruit small, in clusters, yellowish brown, deep dull red cheek, fine grained, sweet, very juicy, melting,

buttery, delightful musky aroma, the richest and highest flavored of pears. Requires a rich soil and high culture.

St. Ghislain, medium, pyriform, pale yellow, buttery, juicy, fine flavor, estimable, tree vigorous, productive.

Saint Nicholas, or Duchesse d'Orleans, medium to large, pyriform, golden yellow, often russeted, red cheek, buttery, melting, rich, delicious, very handsome.

Stevens' Genessee, large, round obovate, often flattened, half buttery, sweet, rich, fine flavor, nearly first rate, tree vigorous, productive.

Triomphe de Jodoigne, very large, pyriform, deep yellow, dark red cheek, juicy, melting, good flavor, growth vigorous, productive.

Urbaniste, rather large, obovate, pale yellow, slightly russeted, melting, buttery, delicious perfumed flavor, very fine, growth vigorous.

Van Assche (Van Assene, erroneously), rather large, obovate, dull yellow, buttery, melting, rich fine flavor.

Van Mons Leon le Clerc, very large and splendid, long pyriform, yellowish green, fine grained, buttery, melting rich, fine flavor, the body and branches are grooved, and have an unthrifty appearance, productive.

Washington, medium, obovate, clear yellow, red dots on sun side, very juicy melting, rich, perfumed, very sweet, first rate flavor, tree vigorous, very productive.

CLASS III.—WINTER PEARS.

Alexandre Bivort, medium, greenish russet, juicy, very melting, sweet, very highly perfumed, excellent flavor, succeeds well on quince.

Belle de Noel, or Fondante de Noel, medium, obovate, greenish yellow, dark red cheek, melting, juicy, fine flavor, much esteemed.

Beurré d'Arenberg, large, short pyriform, greenish yellow, partially russeted, buttery, melting, rich, high subacid flavor, very productive, tree unthrifty, of slow growth, the shoots covered with small wart-like excrescences. It should be superseded by the Soldat Laboureur and Gloux Moreceau.

Beurré Bachelier, large, fair, yellow, buttery, rich flavor, excellent, first rate, one of the most valuable new varieties.

Beurré, Easter, large, obovate, yellowish green, partially russeted, reddish cheek, fine grained, very buttery, melting, and when well ripened of excellent first rate flavor, tree vigorous, and succeeds well on quince.

Beurré Rauce, medium, pyriform, dark green, melting, sweet, juicy, fine flavor, better at the south than at north, tree vigorous, productive.

Beurré gris d'hiver nouveau, medium, obovate, greenish, considerably russeted, buttery, melting, very juicy, rich, slight subacid, resembling in flavor the Beurre d'Arenberg, very valuable.

Chaumontel, succeeds only on Quince, a large, noble fruit, pyriform, yellowish mingled with brownish red, deep red cheek, buttery, melting sugary, excellent flavor, it requires warm rich culture.

Columbia, large, fair, and handsome, obovate, pale yellow, buttery, melting, moderately rich, second rate flavor, tree vigorous, very productive.

De Spoelberg, medium, or rather large, obovate, yellow, purplish cheek, buttery, melting, rich, fine flavor, requires rich soil and good culture.

Doyenne d'Alencon, or Doyenne d'hiver nouveau, medium, obovate, yellowish green, buttery, melting, excellent flavor, highly esteemed, keeps well through the winter, tree vigorous, and exceedingly productive. This is a most valuable and reliable fruit to grow for the markets and for exportation. It succeeds well on both Quince and Pear.

Doyenne Gonbault, medium size, very melting, juicy, fine flavor, first quality, highly esteemed, very productive, grows well on the Quince.

Fondante de Malines (Esperin), medium size, melting, very juicy, excellent flavor, first rate, one of the finest new varieties, tree hardy and vigorous, succeeds well on the Quince.

Glout Moreceau, large, short pyriform, greenish yellow, fine grained, buttery, melting, sweet, without acid, rich, excellent flavor, tree exceedingly vigorous and productive, succeeds remarkably well on the Quince. This is the *original and true* Beurré d'Arenberg. The blunder of substituting an erroneous one originated at Boston, as we may explain hereafter.

Josephine de Malines, medium, roundish, obovate, yellow, blush cheek, melting, juicy, vinous,

fine flavor, greatly esteemed, and by many placed in the highest rank.

Lawrence, rather large, melting, juicy, rich flavor, much esteemed, tree very hardy, very vigorous, and exceedingly productive. It is admirably suited for barreling to send to our distant cities, and for exportation, and is destined to be among Pears what the Newtown Pippin is among Apples.

Monarc, Knight's, large, obovate, yellowish brown, reddish cheek, buttery, melting, rich, fine flavor. Spurious kinds have been sold under this name.

Passe Colmar, medium, pale yellow, fine grained, buttery, juicy, sweet, rich, excellent, first rate flavor, tree of flexuose, irregular growth, over productive, and the fruit must be thinned out.

St. Germain, an old variety of great excellence, large, pyriform, yellowish green, faint brown cheek, juicy, melting, sweet with a sprightly subacid, very agreeable flavor, first rate, highly esteemed. It does not do well on the Pear at the North, and should be grown there on the Quince. It will probably suit the South much better.

St. Germain, Prince's, rather large, obovate, green, much russeted, dull red cheek, melting, juicy, slightly vinous, very agreeable fine flavor. one of the very best winter pears, tree vigorous,

very productive. This is a most valuable Pear to be grown for barreling and supplying our distant markets, or for exportation.

Soldat Laboureur, large yellow, buttery, melting, high flavored, excellent, first rate, tree very vigorous and productive. This is much to be preferred to the Beurré d'Aremberg, which is similar in quality, but of very unthrifty growth, and advances but slowly in comparison with this variety.

Suzette de Bayav, yellow, speckled reddish brown, very juicy, half melting, sweet, high flavor, excellent, greatly esteemed.

Vicar of Winkfield, quite large, very fair and handsome, long pyriform, pale yellowish green, dull red cheek, buttery, juicy, good second rate flavor, sometimes slightly astringent, but when ripened in a warm temperature, it is a good dessert pear, tree very vigorous and exceedingly productive, and it forms a noble tree even on the Quince stock. The long keeping of the fruit and its excellence for cooking render it eminently valuable, and it may be grown most profitably for market and exportation to any extent.

Winter Nellis, medium or under, roundish, obovate, yellowish green, much russeted, fine grained, buttery, very melting, rich, sweet, perfumed, high and excellent flavor, growth slender, flexuose and straggling, very productive, early in bearing.

CLASS IV.—BAKING AND STEWING PEARS.

Bergamot, Easter, medium or rather large, round obovate, yellowish green, firm, buttery, melting, juicy, third rate for dessert, but excellent for cooking throughout the winter.

Black Worcester (Iron Pear of Boston), rather large, short ovate, dark russet on light green surface, firm, coarse, rather austere, but cooks well with a rich flavor, and is highly esteemed, tree of straggling, irregular growth, produces heavy crops, which are very profitable for market.

Bonchretien, Spanish or Vermilion, rather large, pyriform, deep yellow, bright red cheek, crisp, rich and first-rate for cooking.

Bonchretien, Flemish, medium, obovate, pale green, brown cheek, crisp, juicy, tender when cooked, a first rate culinary fruit throughout the winter.

Catillae, very large, turbinate, yellow, often reddish cheek, firm, but valuable for cooking, becomes tender and excellent.

Chaptal, large, obovate, estimable for cooking, tree vigorous and productive.

Uvedale's St. Germain, or Pound, very large and showy, has weighed two pounds, pyriform, yellowish green, brown cheek, flesh solid, suitable for long keeping, a first-rate culinary pear, tree of very strong and vigorous growth, and attains the loftiest dimensions, producing great and regular crops. Great quantities are sold in the New York markets for exportation, and it may be grown and barreled with as much facility as Apples are.

CHERRIES—PRUNUS CERASUS.

Standard Trees, of large growth, 2 to 3 years,	37 to 50 cts.
Pyramid and Dwarf Trees, of low growth, 2 and 3 years,	37 to 50 cts.
Trees of both the above classes, 4 to 7 years old, in a bearing state, 75 cts. to \$1, and \$1 50	
Dwarf Standards on Mahaleb,	37 to 50 cts.

Note.—All the Cherries we cultivate for the North and West are on the Mahaleb Stock, as Trees on the Mazzard stock will scarcely survive the severe winters of those regions.

CLASS I.—HEART CHERRIES.

American Amber, medium, obtuse heart shape, dark pink color, tender, sweet, rich, excellent; tree very vigorous and productive, an indispensable variety. Ignorant persons condemn it, not having seen it, and confuse it with other varieties.

Baumann's May, one of the earliest, ten days before Mayduke, rather small, heart shape, dark red, becoming black, sweet, juicy, moderate flavor, growth very vigorous, exceedingly productive.

Black Eagle, medium, roundish, nearly black, very sweet and rich, high flavor, excellent.

Black Tartarian, quite large, splendid, heart shaped, shining black, half tender, consistent, sweet, rather rich, fine flavor, tree vigorous, remarkably upright, very productive.

Belle d'Orleans, earliest of all, white, shaded with pale red, tender, juicy, delicious, growth very vigorous, productive, highly esteemed.

Brant, large, heart shape, reddish black, half tender, sweet, juicy, rich flavor.

Burr's Seedling, medium, heart shape, bright red on pale yellow, half tender, sweet and juicy, growth slender.

Champagne, (Downing,) medium, roundish, heart shape, bright red shaded, juicy, sprightly, rich flavor.

Columbia, a large and estimable Seedling variety, originated at Newtown, Long Island.

Cumberland, may prove a synonym, large, obtuse heart shape, purplish crimson, rather firm, fine flavor, first quality.

Coe's Transparent, medium, nearly globular, pale amber, red cheek, very tender, sweet, melting, excellent, tree very vigorous, productive.

Delicate, medium, roundish, yellow and light red, mottled, sweet, tender, juicy, high flavor, excellent.

Doctor, medium, roundish, pale yellow and red, sweet, tender, juicy, delicious flavor.

Downer's late red, medium, round heart shape, bright red, mottled with amber, tender, sweet, delicious, not subject to rot by rainy weather.

Downton, large, round heart shape, cream color shaded with red, tender, rich, delicious flavor.

Early purple Guigne, very early, ripe next after Belle d'Orleans, and at same time as Baumann's May, size medium, heart shaped, dark red, nearly black, tender, sweet, juicy, rich flavor, tree less vigorous than most others of this class.

Early Black Heart, medium to large, heart shape, black, tender, juicy, excellent, very estimable, tree vigorous and productive.

Favorite, (Elliott's) medium, round, yellow marbled, carmine cheek, sweet, juicy, delicate, requires high culture to perfect its size and flavor, otherwise is inferior.

Golden Guigne, medium, round, bright golden color, honeyed sweet, tender, delicious, thin skin, beautiful, a very distinct fruit, tree vigorous, very productive, in clusters.

Governor Wood, largest size, roundish, pale yellow, marbled with carmine, half tender, sweet, juicy, rich, high flavor, very estimable.

Graffion.—**Bigarreau**.—**Yellow Spanish**. This is not a genuine Bigarreau, that title applying only to *firm* and *crackling* cherries. Fruit very large, obtuse heart shaped, clear yellow, pale red cheek, beautiful, tender, rich flavor, excellent, tree vigorous, very productive. This variety is greatly esteemed for its size, beauty, and abundant crops. It was introduced by William Prince, from England, under the name of Yellow Spanish.

Hovey, large, heart shape, amber nearly covered with bright red, rather firm, tender, sweet, fine flavor, tree vigorous, productive.

Jocosot, large, heart shape, shining liver color, almost black, tender, sweet, juicy, rich flavor.

Kirtland's Mary, large, roundish, light and dark, glossy red mottled on yellow, firm, sweet, juicy, rich, very high flavored.

Knight's Early Black, large, heart shape, black, tender, juicy, very rich, high flavor, excellent.

Large Black Heart, considerably larger than the common Black Heart, (which we reject,) beautiful, shining black, obtuse heart shape, tender, sweet, juicy, excellent, first quality, tree exceedingly vigorous and productive.

Logan, medium, heart shape, purplish black, rather firm, sweet, juicy, rich flavor, tree hardy, vigorous, moderately productive.

Madison, called by some Bigarreau, medium, heart shape, yellow marbled with red, half tender, sweet, fine flavor, very productive.

Mammoth, (Kirtland's) very large, but not equal in size to the Large Red Prool, yellow marbled with red, tender, sweet, juicy, fine flavor, and moderately productive.

Manning's Mottled, medium, round heart shape,

amber mottled with red, tender, sweet, good flavor, second rate, productive.

Ohio Beauty, large, heart shaped, dark and pale red marbled, tender, juicy, high flavor, tree very vigorous, productive.

Oseola, medium to large, heart shape, purplish red, nearly black, sweet, juicy, rich flavor.

Pontiac, large, heart shape, purplish red, nearly black, tender, sweet, juicy, pleasant flavor.

Powhattan, medium, roundish, bright liver colored, half tender, sweet, juicy, pleasant, not high flavor, tree vigorous, productive.

Robert's Red Heart, large, obtuse heart, bright red, excellent flavor.

Sparhawk's Honey, medium, round heart, pale amber to bright red, sweet, juicy, fine flavor, rather late, very productive.

Tecumseh, medium to large, heart shape, reddish purple, mottled, half tender, sweet, very juicy, not high flavor, hardy, late in blossoming.

Werder's Early Black, medium, roundish heart, purplish red, nearly black, tender, sweet, juicy, rich flavor.

White French Guigne, rather large, creamy white, sweet, tender, juicy, excellent, tree vigorous, very productive. White Cherries are not liable to attack from Birds, as Red and Black Cherries are.

CLASS II.—BIGARREAU CHERRIES.

Bigarreau de Mezel, very large, heart shaped, dark red, firm, sweet, excellent, beautiful, highly esteemed, growth very crooked and irregular.

Black Bigarreau of Savoy, very large, roundish heart, shining black, beautiful, firm, fine flavor, excellent, tree vigorous, productive. One of the most admired varieties.

Black Hawk, large, heart shape, deep purplish black, sweet, juicy, rich, fine flavor, estimable.

Buttner's Yellow, medium, roundish, pale yellow, firm, sweet, good flavor, late, tree vigorous.

China Bigarreau, medium, heart shape, amber, beautifully mottled with red, half tender, sweet, peculiar flavor, second rate, rather late. Grown from seed by William Prince.

Cleveland, large, roundish, bright red on yellow, juicy, rich, fine flavor, very vigorous, and very productive.

Elton, or Flesh-colored Bigarreau, large, pointed heart, pale yellow shaded red, flesh firm, becomes rather tender, rich, high flavored, excellent, one of the finest cherries in all respects.

Florence, large, heart shaped, amber, yellow marbled with red, red cheek, firm, sweet, juicy, rather late. Resembles Grafion, but later.

Holland, large, oval heart, creamy white, mottled red next sun, firm, sweet, good, not high flavor.

Keokuk, large, heart shape, dark purplish black, tender, rather coarse, deficient in flavor, does well for market, tree very vigorous.

Late Bigarreau (Kirtland's), large, obtuse heart shape, yellow, bright red cheek, firm, sweet, juicy, pleasant flavor.

Leather Stocking, medium, heart shape, deep

red at maturity, very firm, sweet, good flavor, bears distant transportation, vigorous, moderately productive.

Large Heart Shaped, or Gros Cœuret, very large, heart shape, shining blackish red, firm, sweet, rich, excellent flavor, a splendid fruit, tree vigorous, productive.

Large Red Prol, Great Bigarreau of Downing, introduced by William Prince from the south of France, the largest of all Cherries, oval, heart shape, splendid, shining blackish red, flesh firm, red, very sweet, rich, excellent flavor, tree very vigorous, productive, the first of Cherries in estimation. We have disseminated this splendid Cherry for above 30 years, and other Nurseries are now beginning to cultivate it.

Napoleon, very large, heart shape, pale yellow spotted with deep red, very firm, fine flavor, scarcely first rate, rather late, tree vigorous, very productive, a suitable market fruit.

Red Jacket, large, heart shape, amber shaded with pale red, tender, juicy, good, but not of high flavor, very productive, ripens late.

Rockport, large, roundish, bright red mottled on pale yellow, firm, sweet, juicy, rich, delicious flavor, very vigorous, productive.

Tradescant's Black, or Elkhorn, large, oval heart, black, firm, leathery, not juicy, fine flavor, a very beautiful variety, ripening rather late after other kinds are scarce, well suited for distant carriage to market.

Wendell's Mottled, medium or large, obtuse heart, dark red nearly black, mottled, firm, crisp, high flavored, rather late.

CLASS III.—DUKE AND MORELLO CHERRIES.

The fruit of this class is generally round, or nearly so.

Belle de Choisy, medium, pale amber mottled with red, bright red cheek, very tender and very juicy, mild subacid, nearly sweet, moderately productive.

Carnation, creamy white, mottled with red, firmer than others of this class, partially bitter at first, then mild acid, rich, pleasant flavor, second quality, distinct Spanish variety.

De Planchoury, large, dark red, sweet, tender, juicy, estimable.

Donna Maria, medium, dark red, tender, subacid, juicy, estimable for cooking, forms a small compact tree, very productive.

Duchesse de Palluau, large, dark red, acid, tender, juicy, excellent.

Jeffrey's Duke, medium, bright red, tender, juicy, rich, fine flavor, growth slow, very compact.

Kentish, or Early Richmond, medium, full red,

acid, very juicy, fine flavor, excellent for early cooking, ripens early and hangs long free from rot.

Late Duke, large, rich, deep red, subacid, not so rich as Mayduke, ripens very late, productive.

Magnifique de Seeaux, or Belle Magnifique, quite large, rich red, mild flavor, not highest quality, productive, one of the best late varieties.

May Duke, or Holman's Duke. Three fourths of the trees sold under this name are spurious, they being a late variety. The genuine is one of the earliest Cherries, large, red, becoming nearly black at full maturity, acid, very juicy, rich, excellent and grateful flavor, very hardy and productive.

Morello, English, medium to large, dark blackish red, rich acid, slight astringency, juicy and

good, very productive, growth slow, like all others of the Morello family.

Morello, Imperial, good size, round, dark purplish red, tender, juicy, rich acid, estimable, very productive,

Morello, Plumstone, large, roundish heart, deep red, rich acid flavor, juicy, excellent, very late, the Stone long and pointed. Most valuable of Morellos.

Reine Hortense, large, sprightly subacid, juicy, rich, excellent, ripens late and hangs long, moderately productive, a valuable acquisition.

Royal Duke, very large, dark red, tender, juicy, rich, excellent, rather late.

Shannon, or Kirtland's Morello, medium, globular, deep purplish red, tender, juicy, acid, ripens late.

PLUMS—PRUNUS DOMESTICA.

Usual size, 50 cents each. Extra large trees, of bearing size, 4 to 7 years, \$1 to \$1 50. Dwarf trees, 37 to 50 cents, according to age.

DESCRIPTIONS OF PLUMS.

Autumn Gage, medium, ovate, pale yellow, juicy, sweet, pleasant, free.

Bingham, large, deep yellow, red spots next sun, juicy, rich, delicious, handsome, productive.

Bleeker's Gage, medium, ovate, yellow, sweet, rich, luscious, free.

Bradshaw, very large and showy, oval, dark purple, juicy, good flavor, tree vigorous, erect, highly productive.

Cherry, or Early Scarlet, nearly medium, round, brilliant red, subacid, tender, juicy, melting, not rich, second rate, cling, tree vigorous, very ornamental by its early and profuse bloom. The Golden Cherry is similar in quality, but of a golden yellow color. Both varieties are free from knots on Long Island.

Coe's Golden Drop, very large, oval, pale yellow, often dotted, firm, sweet, rich, not fine grained, cling, an excellent late variety.

Columbia, very large, handsome, globular, brownish purple, blue bloom, moderately juicy, rich, good flavor, rather coarse, not first rate, free, the fruit is liable to rot, tree very productive.

Denniston's Red, medium, ovate, pale red, fawn dots, rich, good second rate flavor, free.

Denniston's Superb, medium, roundish, yellowish green, mottled with purple, not juicy, but rich, vinous, and free.

Downton Imperatrice, unusually free from the curculio, medium, oval, pale yellow, acid becoming rather sweet, melting, valuable for preserves, ripens late.

Duane's Purple, very large, oblong oval, reddish purple, lilac bloom, moderately sweet, juicy, second rate flavor, cling, esteemed for its large size and beauty, a very profitable market fruit.

Elfrey, under medium, oval, blue, firm, dry, very sweet, quite free, healthy growth, free from knots here, very productive.

Emerald Drop, medium, long oval, yellowish green, juicy, rather rich, cling, second rate.

Frost Gage, rather small, roundish, deep purple, tolerable for eating, but well suited for preserves. The tree is more subject to knots than any other variety, and we have nearly ceased to cultivate it.

General Hand, largest of plums, golden yellow, sweet, moderate, not high flavor, highly attractive for its size and beauty, tree remarkably vigorous, very productive.

Green Gage, the true variety is full medium, and not small as misrepresented, round, yellowish green, dotted red at base, sweet, melting, aromatic, exceedingly rich. The tree is so unthrifty that it has been nearly abandoned, and the Imperial Gage, a seedling from it, now takes its place almost universally.

Huling's Superb, one of the largest, roundish, yellowish green, rather firm, sweet, rich, sprightly, excellent, free, tree vigorous, large foliage.

Iekworth Imperatrice, medium, or rather large, obovate, purple, sweet, juicy, rich flavor, ripens late, becomes drier and sweeter, and keeps into winter.

Italian Damask, medium, roundish, brownish violet, firm, sweet, high flavored, estimable, free, tree vigorous, productive.

Italian Prune, or Felleberg, a most vigorous and productive tree and unusually free from the curculio, and also free from knots. Fruit large, oblong, purple, handsome, estimable for dessert, and also for preserving, or drying.

Imperial Gage, large, oval, pale yellowish green, juicy, melting, rich, free, tree very vigorous, remarkably and regularly productive, better suited to all localities than any other variety. Always free from knots on Long Island, and less subject than most others to the attacks of the curculio.

Imperial Milan, large, oval, deep purple, sweet, juicy, estimable.

Imperial Ottoman, medium, oval, greenish yellow, marbled, sweet, very juicy, excellent, scarcely adhering, tree hardy, succeeds in Maine, exceedingly productive.

Jefferson, large, oval, greenish yellow, very juicy, rich, excellent, nearly free, one of the largest and most estimable.

Lawrence's Favorite, large, roundish, yellowish green, juicy, rich, excellent, high flavor, free.

Lombard, unusually free from the curculio, medium, ovate, violet red, pleasant flavor, not rich, but of fine quality, tree hardy, very prolific.

Long Scarlet, or Scarlet Gage, medium, oblong, yellowish red, bright red cheek, acid, juicy, rich, cling, good market fruit for preserves.

Magnum Bonum, Yellow, or Yellow Egg, very large, egg shaped, beautiful, coarse, but excellent for cooking, tree vigorous, very productive, profitable for market. The White variety differs only in being of a paler color, and the Red or Purple is so coarse it has been rejected.

Mamelonné, medium, round, greenish, red spotted, juicy, rich flavor, free.

Manning's Prune, or Long Blue, a good variety of German Prune, large, long oval, dark purple, blue bloom, firm, rather juicy, sweet, pleasant, free, very productive.

McLaughlin, medium, roundish, russet yellow, tinged over with red, rather firm, sweet, juicy, excellent.

Orange, one of the largest, oval, yellow, showy, rather coarse, tree very vigorous and highly productive, a profitable market fruit, it is free from knots on this Island.

Orleans, Early, medium, ovate, reddish purple, second rate, moderate flavor,

Orleans, Smith's, large, ovate, dark reddish purple, blue bloom, juicy, rich, nearly first rate, tree very vigorous, productive in nearly all soils, shoots reddish purple, perfectly straight.

Peach, very large, roundish, varies from salmon to brownish red, juicy, sprightly, good flavor, free, rather coarse, but esteemed for its size, beauty, and early ripening, tree vigorous, productive.

Prune d'Agen, a famous variety for drying as prunes, medium, oblong, purple, blue bloom, sweet, estimable, free, very late, profusely productive.

Purple Favorite, medium, or rather large, roundish, brownish purple, tender, juicy, sweet, excellent, free, tree grows slow.

Red St. Martin, or Coe's late red, medium,

roundish, light purplish red, blue bloom, firm, rich, vinous, tree vigorous, very productive. A valuable very late variety.

Reine Claude de Bayay, ovate, greenish yellow, spotted red, rather firm, juicy, sugary, rich, excellent quality, adhering slightly, growth vigorous, very productive.

Red Gage, Prince's, medium, round, ovate, brownish red, juicy, mild sweet, rich, unusually pleasant and refreshing flavor, free, tree vigorous, dark red shoots, very productive.

Schenectady, often called Catherine, small, roundish, deep purple violet, sweet, melting, rich, excellent, growth rather slender.

Shropshire Damson, small, same size as Winter Damson, obovate, purple, first quality for preserves, cling, tree much more vigorous than the other Damson named, not so subject to knots, exceedingly productive. The Winter or Late Damson resembles this, but is very subject to knots.

Washington, very large, ovate, yellowish green with a blush, rather firm, sweet, mild, moderately rich, free, tree free of knots at Long Island.

Yellow Gage, Prince's, medium, oval, golden yellow, rich, sugary, melting, excellent, tree very vigorous and productive, and on Long Island is free from knots.

PEACHES—AMYGDALUS PERSICA.

Price, 25 cts., except where otherwise noted.

N. B.—Large quantities at very reduced prices. Trees suitable for Dwarfs or Espaliers can be supplied at 37 to 50 cts. Peaches on the Plum stock are valueless for Orchards.

Snow.		

SELECT PEACHES, FOR MARKET, ETC.

Admirable, Early, rather large, roundish, pale straw, marbled, with bright red next the sun, sweet, melting, rich flavor, a firm fruit, keeps well, and bears carriage, very productive.

Admirable, Yellow, very large, round, beautiful, orange color, flesh same color, pleasant Apricot flavor. A rare and estimable variety, ripening late in October, well suited to the South, but cannot mature north of this locality.

Barnard, Early (Alberge erroneously), rather large, deep yellow, red cheek, juicy, melting, good second rate, productive, inferior to Bergen's Yellow.

Barrington, large, regular oval, beautiful, pale straw, marbled with light red, very tender, sweet, very juicy, rich, and luscious, very estimable.

Bergen's Yellow, very large, roundish, deep orange, broad crimson cheek, juicy, rich, luscious, excellent, greatly esteemed.

Brevoort, medium, round, white, bright red cheek, sweet, rich, high flavor.

Cole's Early Red, medium, roundish, mottled red, bright red cheek, juicy, rich, fine flavor, early, very productive, white, bright scarlet cheek, melting, juicy, rich, faint acidity.

Cooledge's Favorite, medium, roundish, white, bright scarlet cheek, very melting, juicy, rich, faint acid flavor, much esteemed.

Crawford's Early (Melacoton), very large, oval, showy, yellow, red cheek, very juicy, faint acid, rich, good but moderate flavor, productive. A favorite market variety.

Crawford's Late (Melacoton), very large, roundish, splendid appearance, yellow, broad, deep red cheek, rich, juicy, vinous, good, but moderate

flavor, productive. A very showy and favorite market variety.

Early Newington, of Downing (not Smith's Early Newington, which is a cling), an old variety renamed, medium size, roundish, white, marbled with red, rich, red cheek, juicy, fine rich flavor, early and valuable.

Early York, Large (also called Haines' Early, and by many other names), large, roundish, whitish, with red dots, deep red cheek, very juicy, mild, rich flavor, excellent, greatly esteemed. Originated, by William Prince, from the Red Rare-ripe.

Early York, Serrate (an European variety renamed), medium, roundish, ovate, greenish white, dark red cheek, tender, juicy, rich, slight acidity, very productive, early.

Early White Globe, ripens immediately after the Nutmegs, medium size, round, white, sweet, good flavor, not very juicy, a favorite and peculiar variety, differing from all others that ripen at the same period.

Fox's Seedling, rather large, round, white, red cheek, sweet, juicy, estimable, ripens late.

George IV. (a synonym, but best known under this name), large, round, whitish, dotted with red, dark red cheek, juicy, melting, rich, excellent, moderate bearer.

Grosse Mignone, a rare variety, although the name is in every catalogue, *large flowers*, fruit large, rounded, some rather ovate, pale yellow, mottled with red and yellow, deep velvety purplish red, and red about the stem, juicy, melting, sweet, very rich, vinous flavor, luscious, unsurpassed.

Heath Free (this is not at all similar to Ken-

rick's Heath, as many erroneously state), rather large, oval, greenish straw color, often slightly shaded with red near the stem, flesh white to the stone, juicy, tolerably sweet, subacid, not high flavored, sometimes bitterish, second rate for dessert, but makes admirable preserves.

Heath Cling, very large, oval, white, tinged red next sun, quite downy, very juicy, sweet, high, rich, excellent flavor, it must be ripened in the house in same manner as pears, and then surpasses all other peaches in flavor.

Howard's Splendid, large, oval, white, sometimes tinged with red next sun, ripens late, suited to the South.

Jacques (Rareripe), large, roundish, deep yellow, shaded with red, juicy, melting, good, second rate quality.

Large White Cling, large, round, beautiful, white, light red cheek, very juicy, sweet, rich, high flavored, delicious. It is best when ripened for 4 or 5 days in the house, which is the only proper course with all Clingstones.

Late Admirable, large, roundish, pale green, pale red cheek, marbled with darker red, juicy, delicate, excellent flavor.

La Grange, rather large, oval, white, seldom any tinge of red, juicy, rich, fine flavor, much esteemed, ripens late.

Lemon Cling, very large, splendid, oval, rich yellow, bright red cheek, high lemon flavor, rich, aromatic, excellent, makes admirable dumplings and preserves.

Nivette, or Orange Free, large, ovate, pale lemon color, sometimes a faint red cheek, juicy, melting, very sweet, luscious, rich flavor, has few or no superiors.

Noblesse, large, ovate, pale green, dull red cheek, very juicy, rich, high flavor, delicious.

Oldmixon Free, large, roundish, white marked red, dark red cheek, tender, rich, luscious, excellent, very productive, a favorite market fruit.

Oldmixon Cling, large roundish oval, yellowish white, dotted red, deep red cheek, juicy, rich, high flavor, productive.

Orange Melacoton, very large, splendid, roundish, deep yellow, broad deep red cheek, juicy, sweet, luscious, devoid of the acidity that attaches usually to yellow-fleshed peaches, a most estimable new variety.

Pavie de Pomponne, or Monstrous Pomponne, the largest of peaches, ovate, greenish yellow marbled with red, very dark red cheek, juicy, sweet, rich, fine flavor, requires a long summer to mature in this latitude, well suited to the South. Distinguishable by its broad foliage and vigorous growth. Flowers small. Nearly all sold under this name are spurious, and even Mr. Downing never saw the genuine, and states mistakenly that it has large flowers.

Pavie Tardive, or October Scarlet, large, ovate, beautiful, pale straw, deep red cheek, sweet,

juicy, excellent, very productive. It is the most valuable of all late peaches to grow for the market, but is rarely to be met with in the nurseries.

President, rather large, ovate, white, dull red cheek, very juicy, luscious, fine flavor.

Prince's Excelsior, very large, round, splendid, entirely bright orange color, flesh golden yellow to the stone, parts freely, sweet, very juicy, extra rich, delicious, exquisite orange flavor, none superior, a remarkable acquisition, ripens middle of October, well suited to the South.

Prince's Paragon, large, showy, oval, pale yellow, slightly red shaded cheek, juicy, rich, luscious, fine flavor. An erroneous variety is often sold under this name.

Rareripe, Golden, large, yellow, red cheek, juicy, rich, good flavor, handsome.

Rareripe, Red, or Morris' Red, rather large, white, dark red cheek, juicy, rich, high flavored, excellent.

Rareripe, Prince's Late Red, large down to medium, roundish, pale yellow, partially reddened next sun, sweet, juicy, rich, very luscious, first quality.

Rareripe, White, or Morris' White, medium, roundish, white, sometimes purple tinge on cheek, juicy, melting, rich flavor, much esteemed.

Rareripe, Yellow (Yellow, Alberge of some), large, roundish oval, deep orange, rich red cheek, mealy, without juice until fully ripe, then sweet, juicy, rich, good flavor, second rate.

Red Cheek Melacoton, large, ovate, yellow, deep red cheek, juicy, rich, luscious flavor, very productive, estimable for market.

Scott's Magnate (Rareripe), very large, splendid, roundish, oblate, whitish, deep red cheek, flesh white, juicy, excellent, a new and very beautiful variety.

Scott's Nectar (Rareripe), large, roundish, whitish, bright red cheek, flesh white, very sweet, delicious flavor, a beautiful and excellent new variety.

Scott's Nonpareil, large, roundish, deep yellow, red cheek, flesh yellow, sweet, juicy, and fine flavor, resembles Crawford's Late, but far superior in quality.

Strawberry, medium, oval, mostly marbled with deep red, melting, rich fine flavor, early.

Stamp the World, large, ovate, white, red cheek, juicy, rich, fine flavor, productive, a favorite market fruit.

Van Zant's Superb, medium, oval, white beautifully mottled with red, sweet, juicy, fine flavor. A spurious *round* variety is almost universally disseminated by this name.

White Blossom Incomparable, rather large, oval, entirely white, juicy, good, with moderate flavor; Flowers white, large. The *Snow* peach is inferior to this, and is distinguished by its small flowers.

NECTARINES—AMYGDALUS NECTARINA.

Price 37½ cents except those noted.

C denotes *Clingstones*—all others are *Freestones*.

N. B. Trees of all the varieties suitable for Dwarfs or Espaliers, at 37 to 50 cts.

1 Baker.	11 Elruge.	20 Monstrueux, 50 cts.
2 Boston or Lewis.	12 Golden, Prince's C. 50 cts.	21 Murrey.
3 Broomfield.	13 Hanchet's Imperial, 50 cts.	22 Newington, C.
4 Cambridge.	14 Hardwicke seedling.	23 Newington, Early, C.
5 Chauviere, 50 cts.	15 Hunt's Tawny.	24 New white.
6 Després, 50 cts.	16 Imperatrice, 50 cts.	25 Peterborough.
7 Downton.	17 Jaune lisse—Late Yellow (for the South).	26 Pitmaston orange.
8 Duc de Tellier.		27 Roman— <i>Red Roman</i> .
9 Early Violet— <i>Violette hative</i> .	18 Large early Violet, 50 cts.	28 Stanwick.
10 Early White, 50 cts.	<i>Violette grosse</i> .	29 <i>Violette sucré</i> , 50 cts.

SELECT NECTARINES.

Boston, large, bright yellow, red cheek, flesh, yellow, sweet, very agreeable flavor.

Downton, large, melting, rich, excellent, tree very hardy.

Early Violet—*Violette hative*, medium, juicy, melting, rich, excellent, one of the best.

Early Newington, very large, rich, excellent, much esteemed.

Elruge, medium, juicy, melting, rich, excellent, one of the best.

Hardwicke Seedling, medium, melting, rich, very good; tree very hardy.

Hunt's Tawny, flesh yellow, melting, rich, fine flavor, early.

Imperatrice, large, juicy, melting, excellent flavor.

Large Early Violet, very large, juicy, melting, excellent, a rare and superior French variety.

New White, large, melting, rich, luscious; tree very productive, one of the most hardy and reliable for crops.

Pitmaston Orange, large, yellow, bright red cheek, flesh golden yellow, juicy, melting, very good; tree hardy, very productive.

Prince's Golden, large, splendid, golden yellow marbled with bright red, juicy, fine flavor, well suited for the South, but matures here also.

Roman, large and beautiful, rich, very good when fully ripe.

Stanwick, large, melting, rich, excellent quality, one of the finest.

APRICOTS—PRUNUS ARMENIACA.

37 to 50 cts.

N. B. Trees of all varieties suitable for Dwarfs or Espaliers, 50 cts.

1 Alberge de Tours, le gros.	10 Early Golden, Dubois'.	20 Moorpark (De Nancy).

	19 Masculine, Red.	29 Viard, 81.

SELECT APRICOTS.

Alsace, very large, juicy, rich, excellent; tree vigorous and hardy.

Black or Purple, round, medium size, purple, juicy, pleasant; a native of Siberia, very hardy, ripe in August.

Breda, small, round, deep orange and red, fair second quality, very productive, one of the most hardy, early in August.

Early Golden, very similar in size and quality to the above, and probably a seedling from it. hardy and very productive; middle July.

Early Peach, large, yellow and red, rich, high flavored—August.

Kaisha, medium, sweet, juicy, pleasant flavor flesh transparent; early in August.

Lafayette, very large equal to a medium sized

peach, oblong, orange and red, rich, high flavored, delicious, the most splendid of all. An American seedling.

Large Early, large, oval, yellow and red, juicy, good flavored, very vigorous, very productive, one of the most reliable for crops; early in August.

Large Early Red, large, roundish, deep yellow, juicy, rich flavor; tree vigorous and hardy.

Large Peach, very large, roundish, yellow, red cheek, juicy, rich flavor, one of the finest; tree very vigorous, very distinct from the Moorpark. August.

Moorpark, large, roundish, yellow, red cheek, sweet, juicy, rich, excellent; tree very productive. August.

Orange, medium, spherical, orange color, good second quality, slightly acid, excellent for tarts and preserves; tree vigorous.

Red Masculine, earliest of all, medium size, roundish, yellow and red, good second quality, very productive; tree vigorous. Early in July.

Roman, large, sweet, good, but rather dry, useful for tarts and preserves; tree vigorous, hardy, and very productive.

Royal, large, oval, orange, juicy, rich, excellent flavor; tree vigorous and hardy. End of July.

St. Ambroise, large, juicy, pleasant flavor, one of the finest early varieties.

Viard, large, juicy, rich, excellent; tree hardy, vigorous, productive.

ALMONDS.

Those marked thus (†) are 37 cts. and the others 50 cts.

N. B. Sweet Almonds, for Orchards, \$25 per 100.

- 1 † Sweet hard shell, *most hardy*.
- 2 Ladies' thin shell (*for the South*).
- 3 Pistachia (*for the South*).
- 4 Sultan (*for the South*).

- 5 Long hard shell.
- 6 Soft shell.
- 7 † Great fruited, *Macrocarpa*, or *Languedoc*.
most hardy.

ORNAMENTAL VARIETIES.

SELECT FIGS—FIGUIERS.

The culture of this delicious fruit has recently become an object of particular attention, and the Trees require no more care or protection in winter than the delicate kinds of Grapes, and can be grown at Baltimore, and South of it, in any quantities for market; and we may soon expect the markets of New York and other Northern cities to be supplied from the more Southern localities. The Trees are exceedingly productive and produce two regular crops in a season. We have rejected a number of varieties, such as Cypré, Clementine, &c., which have been found the least worthy of culture.

Those marked †, 50 cents. Those not marked are 75 cents. By the hundred, a discount of one-third in price will be made; and where 25 are taken, 25 per cent. discount.

1	Adam's Fig, <i>enormous size</i> , \$2.	16	Habicon blanc.	29	†Nerii, <i>excellent</i> .

CLASS I.—FOREIGN GRAPES.

Aleppo, Striped, medium, round, large cluster, berries white, black, and half of each color on the same cluster, sweet, sprightly flavor, very productive, hardy, of easy culture.

Austrian Muscat, deemed to be the earliest of grapes, small, black, ovate or roundish, musky, good flavor, the vine of weak growth.

Barbarosa, large, round, purple, large cluster, good flavor, not rich, hangs long on the vine, estimable.

Black Burgundy, or Black Cluster, small ovate, pleasant sprightly flavor, cluster small and very compact, early, hardy, suited to open culture.

Black Hamburg, very large, roundish, large clusters, much shouldered, sweet, rich, first quality, very productive, a most popular variety, universally cultivated in Grape-houses and otherwise.

Black Morocco, large oval, dark red or violet, large cluster, sweet, good flavor.

Black Prince, large, ovate, long cluster often shouldered, sweet, rich, productive, excellent quality.

Black Portugal or Ferrar, medium, oval, handsome, large compact cluster, crisp peculiar cherry-like flavor, much esteemed by many and contrary-wise by others.

Black Prolific, large, round, large cluster, sweet, good, very productive, ripens irregularly.

Black Lombardy, large, ovate, large cluster, sweet, sprightly flavor, excellent quality; one of the best.

Black St. Peter's, large, roundish, long cluster, first quality, ripens late, hangs long after maturity, requires powerful heat.

Bowker, an American Seedling, large, white, ovate, large cluster, as handsome as white Hamburg and of better quality; pleasant flavor, very productive.

Chaptal, large, ovate, white, very large cluster, sweet, excellent, very productive.

Chasselas Golden, or Fontainbleau, large, round, pale amber, sweet, very juicy, refreshing, excellent, very productive in vineries or against walls, a general favorite, and more extensively cultivated than any other variety.

Chasselas Bar sur Aube, large, round, pale amber, splendid, large long clusters, sweet, juicy, excellent. This is probably the best of all the white Chasselas varieties, but is much more rarely met with. It is one of the earliest of its class.

Chasselas Rose or Red, large, round, pale red, sweet, good flavor, very productive.

Chasselas Musquée, medium, round, pale amber, very rich, high musk flavor, excellent.

Constantia of Zante, medium, oval, greenish white, sweet, productive.

Deandolle, large, round, purple, beautiful, very large cluster, sweet, good quality, very productive; requires powerful heat to mature well.

Deccan's Superb, large, oval, amber, beautiful, large cluster, requires great heat to ripen perfectly.

Early Black July, earliest of all, small, round, black, small compact cluster, pleasant sprightly flavor, productive.

Esperione, small, round, dark purple, very large cluster, sprightly flavor, third quality; the vine hardy, vigorous growth, very productive, and suited to outdoor culture.

Early White Malvasia, or Early White Muscadine, medium, round, pale amber, similar in quality to the Golden Chasselas, but ripens ten days earlier. It is so hardy that it will fruit well under outdoor culture.

Frontignan, Black, medium, round, long cluster, rich, musky, excellent, productive, early.

Frontignan, Grizzly, medium, round, gray, becoming red at maturity, medium sized cluster, rich musky flavor, excellent, first quality, early, very productive.

Frontignan, White, medium, round, pale amber, rather large cluster, sweet, musk flavor, excellent, ripens rather early with the Chasselas varieties, vine hardy, productive, and may be grown under open culture in this latitude.

Gros Conlard, large and beautiful, white, delicious flavor, first quality—an early variety of Chasselas.

Lombardy, or Flamed Tokay, round, bright red, sweet, medium flavor, second quality, very large cluster, very productive.

Macready's Early White, large, oval, beautiful thin skin, very juicy, excellent flavor, hardy, productive.

Miller's Burgundy, this fruit is same in quality and the plants equally hardy as the Black Cluster, but is distinguished by the white down on its foliage.

Mill Hill Hamburg, large, purple, excellent flavor, ripens a month after Black Hamburg, requires heat.

Musqué Verdal, medium size, musky, rich purple, good flavor.

Palestine, Raisin *(small, oval)*, white, enormous cluster, much branched, berries scattering, pleasant flavor.

Pitmaston White Cluster, medium, round, compact cluster of medium size, sweet, fine flavor, estimable, quite early.

Portien noir, large, roundish, black, very handsome, peculiar flavor, much esteemed, very late.

Prince Albert, large, ovate, black, large shouldered cluster, handsome, good flavor, ripens late.

Regnier de Nice (*erroneously Reine or Queen of Nice*), large, oval, white, shaded with rose color, very beautiful, large cluster, fine flavor.

Red Traminer, small, roundish, rose color, com-

compact cluster, sweet, aromatic, pleasant for dessert, very productive. An esteemed Wine grape in Burgundy, and much extolled in Ohio.

Raisin de Calabre, large, round, white, large cluster, juicy, rich, musky flavor, excellent, valuable for hanging late.

Royal Muscadine. In size, color, flavor, and excellence, this corresponds exactly with the Golden and Bar sur Aube Chasselas, but in the size of the cluster it is very distinct, and often weighs 4 to 6 pounds.

Syrian White, very large, oval, immense cluster, firm, and when allowed to hang until fully matured, is very good, requires powerful heat to perfect its fruit.

Tokay des Jardins, a beautiful variety of Chasselas, small, rose colored, very sweet, rich Chasselas flavored berries, very estimable.

Verdelho, a Madeira grape, small, oval, white, finest quality, a great favorite, vine of strong growth, very productive.

Victoria Hamburg, closely resembles the Black Hamburg, but appears to be an improved variety.

Wilmot's Black Hamburg, very large, round, compressed, very black, quality variable, often fine. It must hang long after coloring in order to mature the fruit.

White Bual, pale amber, obovate, compact cluster, good flavor, ripens late.

White Corinth. This is not the Sultana; it is a small, white, seedless grape, in compact clusters, very beautiful, sweet, and very pleasant flavor.

White Gaseoigne, large, ovate, large compact cluster, shouldered, fine flavor.

White Hamburg, large, oval, very handsome, large cluster, good second quality in flavor.

White Muscat of Alexandria, large, oval, pale amber, long loose branching cluster, crisp, sweet, highest aromatic musky flavor, ripens late. A most exquisite fruit. Cannon Hall Muscat is a variety of this, and the Tottenham Park and Portuguese Muscates greatly resemble it.

White Riessling, small, compact cluster, sweet, pleasant flavor, very productive, a celebrated Rhenish wine grape, and of easy outdoor culture here—being very hardy.

White Sweetwater, or Chasselas Blanc, medium, round, loose cluster, sweet, good flavor, estimable, but secondary to others of the same class.

White Tokay, medium, ovate, compact cluster, moderate size, sweet, perfumed, in flavor similar to the Golden Chasselas, much esteemed, hardy, productive, and suited to open culture.

Xeres, or White Nice, small, medium, round, monstrous shouldered loose cluster, sweet, agreeable, not rich, vine of strong growth, requires heat to mature well, very productive.

Zinfandel (*erroneously Zinfindal*), medium, round, black, with a thick bloom, large, double shouldered cluster, requires to hang long after coloring to perfect its maturity. Introduced by the late George Gibbs, of Long Island, from Germany.

CLASS II.—NATIVE HARDY GRAPES.

Alexander, medium, round, black, prolific, sweet, juicy, slight musk flavor, a good wine grape, only tolerable for eating. It is also known as the Schuylkill Muscadel.

Amber Catawba, a beautiful seedling variety of the Catawba, pale color, same size, ripens 2 or 3 weeks earlier, sweet, slight musky aroma, mild, pleasant flavor, very estimable.

August Coral, medium, red, sweet, very pleasant flavor, thick skin, very hardy, will succeed in Maine, very productive, ripe in August. A new variety.

Bland, large, round, pale red, juicy, sweet, very pleasant flavor. *It has no pulp whatever*, is an excellent table fruit, and makes a mild but not strong wine.—The genuine can scarcely be found in any Nursery in the Union; the Catawba has been almost invariably substituted for it.

Catawba, well known to every one as an excellent table and wine grape, rather late in ripening for the New England climate. It is grown very extensively for the markets as a table fruit, and in Ohio and other western States, vineyards exist covering some thousands of acres.

Clinton, small or medium, round, black, small compact cluster, juicy, moderately sweet, fair quality, ripe two weeks before Isabella, exceedingly productive, and sufficiently hardy for any of the northern States.

Concord, large, round, black, with a bloom, rather musky, very juicy, pleasant flavor, very hardy.

Delaware, medium or small, round, bright red, sweet, delicate flavor, delicious—the climax in flavor of all northern native grapes—very productive, hardy.

Diana, large, round, red, compact cluster, sweet, pleasant flavor, two weeks earlier than the Catawba, and valuable in localities where that does not mature its fruit.

Early Isabella, a new variety, in appearance precisely like the common Isabella, but ripens full 10 or 12 days earlier, which alone distinguishes it.

Elsingburg, small, black, blue bloom, sweet, juicy, excellent, large cluster, very hardy, vigorous growth, productive.

Isabella, so well known, no description is needed. It is well suited for market as a table fruit, and may also be grown advantageously for wine.

Missouri, small, round, black, sweet, pleasant, but little pulp, good for table and for wine; growth slow, moderately productive.

Norton's Virginia, a Virginian variety, bunch long, fruit small, round, dark purple, vinous, not much juice, somewhat pulpy, rather harsh, but pleasant, rich, and deep colored; vine vigorous, very hardy, and exceedingly productive.

Pond's Seedling, small, round, blue, long cluster, fair quality, very hardy.

Scuppernong, White, rather large, round, white, without pulp, very sweet, finely flavored for table, and very estimable for wine, the aroma of which surpasses all imported wines. A traveled ignoramus says this vine is a native of Greece. It covers naturally a region of our Country more than twenty times the extent of Greece, and no similar plant was ever found in the Eastern Hemisphere.

Shurtleff's Seedling, round, black, loose cluster, good flavor; the vine grows slowly, and is only a moderate bearer.

Sumpter, or Le Noir, small, round, dark purple, large cluster, sweet, juicy, free from pulp, excellent for table, good for wine. A native of S. Carolina, and assimilates to several other varieties found at the South. Not a seedling of any European grape.

Warren (Ohio, of Longworth). This is often called at the South "*Jack Grape*." It was sent to N. Longworth, of Cincinnati, and mystified. It is a Georgian variety, received by us from Warren County in that State, about 20 years ago. Cluster large, long loose shouldered, berries small, round, purple, blue bloom, thin skin, tender, sweet, juicy, excellent, free of pulp, few seeds, growth slow when young, then very strong, large, pale peculiar foliage, very productive. It matures its fruit well in this latitude.

N. B. The Charter Oak is the old Red Fox grape, a downright humbug; the Hartford Prolific is nearly as bad, and the Northern Muscadine is very inferior and has been condemned by several Horticultural Societies. The Sage grape is another miserable native, palmed upon the public as of superior excellence. The silly dupes who have paid one to five dollars each for such trash, could have had Grape Vines of approved excellence for 50 cents.

RASPBERRIES—FRAMBOISIERS.

All the varieties are red except those designated otherwise, and all are ripe in July except the Twice Bearing kinds, which produce a second crop in September or October. The leading kinds will be supplied at reduced rates by the hundred or thousand.

DESCRIPTIONS OF RASPBERRIES.

American Red, ignorantly called "English Red" by some, red, medium size, excellent flavor, very productive perfectly hardy, never injured by the winter.

American White, similar to the Black Cap, in quality, and only varying in color, very hardy.

Antwerp, Large, dark red; fine flavor, very productive, makes admirable preserves, bears carriage, requires winter covering.

Antwerp, Large yellow, fine flavor, excellent, very productive, requires winter covering.

Antwerp, Red, of Hudson River, a much weaker plant than the genuine above named, fruit large, fine flavor, bears carriage to market, requires winter covering.

Cushing, resembles Red Antwerp, large red, fine flavor, productive, requires winter covering. It sometimes produces a second crop in October on the shoots grown during the summer.

Fastolf, red, very large, fine flavor, very productive, requires winter covering during the severest winters.

Franconia, dark red, large, good flavor, very productive, the most hardy of the European kinds, and will usually stand without winter covering.

French, red, good flavor, productive, vigorous but needs winter covering.

Knevet's Giant, red, large, fine flavor, growth remarkably vigorous, one of the most hardy.

Magnum Bonum, yellow, medium size, excellent flavor, in clusters, vigorous, very hardy, seldom requires winter covering.

Large Monthly (Rivers), bright red, large, good flavor, produces a second crop in October.

Orange (Brinckle), buff color, good size, fine flavor, vigorous, one of the most hardy. We have no perfectly hardy variety derived from European parentage, and will not have, until the stupidity of propagating from tender foreign varieties in preference to American hardy varieties ceases to have influence.

White Smooth Cane, large, yellow, fine flavor, productive, the stalks almost spineless.

Prince's Fastolf Seedling, this closely resembles the Fastolf, its parent, but appears to be much more hardy and reliable.

Salmon Berry, California, large, fine fruit, very productive; it appears to be very hardy in this climate.

CURRANTS—GROSELLERS A GRAPPES.

When wanted by the hundred or thousand, they will be supplied at reduced rates.

Extra large-sized bushes, four years' old, can be supplied at a reasonable price.

SCIONS AND CUTTINGS.

Scions of all kinds of Fruit Trees, suitable for grafting, will be supplied when 40 or more kinds are ordered, more or less of each, as convenient to us, at 25 cents per parcel, or at 50 cents per dozen of each variety where the price of a tree does not exceed that sum (50 cents); but where it does, the same price will be charged for the dozen scions, or for a parcel where the kind is very rare, as for a tree of the same kind. When a large number of scions are wanted, of the leading varieties, they will be supplied at \$1 50 per 100, or at the following rates per 1000, all correctly labeled: Apples, \$5, Pears, \$6, Cherries, \$6, Plums, \$10.

Scions of Anger's Quince, for budding Pears on, \$1 50 per 100, and \$10 per 1000, and Scions of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Poplars, Willows, Altheas, Roses, and of all other Trees and Shrubs that will grow from cuttings, \$2 50 per 100 and \$20 per 1000, and Figs and Pomegranates \$5 to \$8 per 100; but no quantity is sent amounting to less than the price of a Tree or Shrub of the same kind. Scions of the six finest species of Osiers, most celebrated for baskets, &c., \$1 per 100 and \$2 to \$5 per 1000. It is better that such orders be sent in the fall or winter, and the scions can be forwarded by express if so ordered.

Scions of Grapes, of a number of the finest Foreign kinds, can be supplied if applied for in season, at from \$6 to \$8 per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties three scions, and of others six scions of any one variety will be considered equivalent in value to a vine. Scions of Isabella, Catawba, Alexander, Clinton, and several other varieties of Grapes, \$10 to \$15 per 1000.

STOCKS FOR FRUIT TREES.

6 Paradise, for Dwarf Apples	3 00	25			

ORANGE, LEMON, CITRON, SHADDOCK, and LIME TREES, and all other GREEN HOUSE TREES and PLANTS, can be supplied at reasonable rates.

CORRECTIONS.

Grapes, page 26—"Child's Superb of Utica," should be a synonym of 56, Deccan's Superb, and not of No. 1, Bar sur Aube.

Raspberries, page 30.—Catawissa, should not be a synonym of Ohio Everbearing—it being a distinct and estimable Red American Everbearing—a variety of No. 1.

Ornamental Department.

SELECT DECIDUOUS ORNAMENTAL TREES.

The following comprise a *Select Assortment* of the most beautiful and estimable species, which our long experience has enabled us to arrange with precision. The inferior species we have omitted.

We have divided them into four classes. The first class comprises those of majestic growth, which attain great stature and ample development; the second class, those which attain a medium size; the third class, those of low stature; and the fourth class, such as are comparatively of slow growth, requiring a long period before they attain the size of a small tree, and which, therefore, it would be more appropriate, in ornamenting grounds, to rank among large Shrubs.

The prices stated are for trees of fair size; but where extra large-sized trees are desired for Streets, Avenues, &c., in order to impart immediate ornament, such can be supplied at proportionate rates, and varying in height from ten to twenty feet, of many of the most estimable species.

Botanical Name.	Common Name.	Class.	Price.
1 <i>Acacia Julibrissin</i>	Sensitive tree.....	4	\$1 00
Acer.	Maple.		
2 <i>Acer dasycarpum</i>	Silvery leaved.....	1	50
	Silvery do extra size, 12 to 14 feet.	1	1 00
3 <i>Acer macrophyllum</i>	Oregon.....	1	50
4 <i>Acer platanoides</i>	Norway.....	1	50
5 <i>Acer variegata</i>	Silver striped leaved.....	3	1 00
6 <i>Acer rubrum</i>	Scarlet flowering.....	2	38
7 <i>Acer saccharinum</i>	Sugar, Hard, or Rock.....	1	50
8 <i>Acer striatum</i> , and 8 other species.....	Striped bark.....	2	50
9 <i>Acer pseudoplatanus</i>	European Sycamore.....	1	50
10 <i>Acer argen</i> , varieg.....	Striped leaved do.....	4	75
Esclusus.	Horse Chestnut.		
11 <i>Aesculus flava</i>	Yellow flowering.....	2	50
12 <i>Aesculus glabra</i>	Green do.....	2	50
13 <i>Aesculus hippocastanum</i>	White do.....	1	50
14 <i>Aesculus flore pleno</i>	Double do <i>splendid</i>	2	1 50
15 <i>Aesculus pavia</i>	Scarlet do.....	4	75
16 <i>Aesculus rubicunda</i>	Coral, or Reddish colored.....	2	1 00
17 <i>Aesculus pallida</i> , dark glossy foliage, holds late, pale yellow flowers.....	Ohio Buckeye.....	1	50
18 <i>Ailanthus glandulosa</i>	<i>Ailanthus</i> , Chinese.....	1	50
19 <i>Alnus incana</i>	Alder, European hoary.....	1	50
20 <i>Alnus lasciniata</i>	Alder, Cut leaved.....	2	75
21 <i>Amygdalus</i>	Almond, Flowering (See page 24.)		
22 <i>Amygdalus</i>	Peach, Flowering, (See page 21.)		
23 <i>Aralia spinosa</i>	Prickly Ash, or Hercules' club.....	2	38
24 <i>Aralia japonica</i>	Japan do, unique and showy.....	2	75
25 <i>Betula alba</i>	Birch, Scotch drooping.....	1	50
26 <i>Betula laciniata</i>	Birch, Cutleaved.....	3	1 00
27 <i>Broussonetia papyrifera</i>	Paper Mulberry.....	2	50
28 <i>Carya</i>	Hickory Nut. (See page 25.)		
29 <i>Castanea</i>	Chestnut. (See page 25.)		
30 <i>Catalpa syringifolia</i>	Catalpa, Variegated flowers.....	1	38
31 <i>Catalpa Daytoni</i>	Catalpa Dayton, new.....	1	75
32 <i>Catalpa Bungeana</i>	Catalpa, Japan, <i>beautiful</i>	2	1 00
33 <i>Catalpa Kempferi</i>	Catalpa, Kempfer's Japan, new.....	2	1 00
34 <i>Cerasus</i>	Cherry, Double Flowering. (See page 15).

	N. B. Twelve other varieties can be supplied.		
155 <i>Virgilia lutea</i>	Yellow-wooded Virgilia	2	1 00

SELECTIONS OF ORNAMENTAL TREES, ETC.

The Trees most suitable for planting in Streets and Avenues, are the Silver, Norway, and Sugar Maples, European Sycamore, the various Elms, Ohio Buckeye, with dark glossy foliage, Paulownia, Oriental Plane, Snowy Abele, the beautiful Salisburia of Japan, Tulip tree, Magnolia acuminata and maxima, American Cypress, European Ash, Red twig Linden, and Silver-leaved Linden.

The common variety of European Linden, and the common Horse Chestnut, drop their foliage so early in autumn that they are entirely unsuited for streets, but will answer for other locations. The Catalpa forms too spreading and irregular a head for planting in streets. The European Alder will best suit any wet locality. The Ailanthus has latterly fallen into disrepute on account of the odor of its blossoms; an evil easily remedied, however, by proper selection, as the odor proceeds only from one sex, latterly introduced, and therefore this objection does not apply at all to the tree originally introduced, which was of the other sex.

All the above-named trees are appropriate for extensive Lawns, to which may be added the Weeping Willow, one of the most elegant and graceful of all trees, and the Ring-leaved Weeping, the Huntingdon Green, and the Golden-bark and Silvery-leaved Willows to aid in the picturesque. The Liquidamber and Scarlet Maple are desirable not only for general ornament, but for their reddening foliage in early autumn, thereby imparting a most pleasing diversity. The trees I have enumerated are not suitable for ordinary small yards and other circumscribed positions; and for this object, we should select trees of secondary stature, such as the Mountain Ash, Magnolia tripetala, Macrophylla, and Auriculata, White Fringed Ornus, Laburnum, Japan Angelica, European Bird Cherry, Blush Acacia, and Virgilia, & c.

We come next to the third Class of Trees, which may be more properly ranked as large Shrubs, as they branch low, and to the largest class of Flowering Shrubs, all of which may be pruned to suit the space to be occupied; such as the Magnolia Norbertiana, beautifully striped, the M. Soulangeriana with paler stripes, M. Glauca and conspicua with white flowers, and the Japan purple, and Chinese Purple and White flowering, the Halesia, Purple Fringe, Japan Sophora, Hawthorn, Cornelian Cherry, Silvery Eleagnus, European Euonymus, the beautiful varieties of Double Althea, Rhamnus carolinus, &c. These will serve to fill up the complement in adornment.

WEeping TREES OF FAIR SIZE.

	Price each.		Price each.
1 Ash, 2 species.....	\$1 to 1 50	8 Laburnum.....	\$1 to 1 50
2 Beech, 2 varieties, Green & Purple	1 50	9 Larch.....	2 00
3 Birch.....	1 00	10 Mountain Ash.....	1 00
4 Cherry, 2 varieties.....	1 to 1 50	11 Peach.....	50
5 Cytisus, 2 species.....	1 00	12 Poplar.....	1 00
6 Elm.....	1 00	13 Sophora.....	1 50
7 Linden.....	1 50	14 Willow, 3 varieties.....	50 to 1 00

DECIDUOUS ORNAMENTAL SHRUBS.

The following comprises a *Select Assortment* of the most beautiful and estimable species. The inferior species are omitted. N. B. Extra large Shrubs of most of the kinds can be supplied at proportionate prices.

Botanical Name.	Common Name.	Price.

70 <i>Cratægus, rubra pleno</i>	Hawthorn , Double crimson.....	75
71 <i>Cratægus, monogyna rosea</i>	Hawthorn , Pink.....	50
72 <i>Cratægus, punicea</i>	Hawthorn , Crimson.....	50
73 <i>Cratægus, variegata</i>	Hawthorn , Variegated leaved.....	50

N. B.—Also, 10 other species of but little ornament.

Transplanting Trees.

BEFORE you remove the Trees intended to be transplanted, or before you unpack any you may have received, you should fully prepare the holes to receive them. But if, from any cause, delay is indispensably necessary in preparing the holes, the trees should be well wet over the roots and branches, and the roots be then entirely well covered in a trench, till you are ready to commence planting them. It is of great benefit to puddle the roots of Trees before planting, which operation should be performed thus:—Make a hole in the ground four feet in diameter, and two and a half deep, and fill it with water; then pulverize equal quantities of rich mould and old decomposed manure, and throw in, and mix the whole well, so as to form a thick puddle. At the time of planting, place the roots of each tree in the puddle, giving the tree two or three turns until the puddle adheres to every root, then proceed immediately to plant it, the holes having been previously prepared as follows: Make the holes full large in proportion to the size and spread of the roots of the trees, so that they may be spread out and in no wise cramped. The usual diameter will be three to four feet, and the depth two to three feet. In removing the earth, place the surface soil aside by itself, and cast away the poisonous bottom soil as useless. Mix in with the surface soil about an equal portion of rich mould, and of old well-rotted manure, in sufficient quantity to replace the inferior soil cast aside, and then pulverize the whole. This done, then spread a portion of the prepared compost at the bottom of the hole, and after having pared any bruised or broken parts of the roots of the tree, place it in position, and at a depth of one inch below that at which it had previously stood. Then whilst one person holds the tree erect, let another fill in the prepared compost till the roots are covered, treading it down well; then fill up the remainder without treading, as the surface should be loose in order to receive the rains. Make a slight cavity around the tree for the same object, and to receive waterings. When thus planted, water the tree plentifully, and do the same occasionally afterwards, and especially if the weather should prove dry. Evergreen Trees are usually transplanted with balls of earth, and, therefore, the puddling will be dispensed with, unless some of the roots should become bare.

THE SACRED CIRCLE;

A Monthly Periodical,
DEVOTED TO THE ADVANCEMENT OF
Spiritual Philosophy and its Eternal Truths.

THE FIRST NO. FOR THE ENSUING YEAR WILL BE ISSUED IN OCTOBER.
TERMS, \$2 PER ANNUM, IN ADVANCE.

EDITORS—JUDGE EDMONDS AND O. G. WARREN.
CONTRIBUTORS AND PUBLISHERS—MISSES S. A. & H. HOYT.

OFFICE, 132 NASSAU ST., NEW YORK.

This is the first Monthly Magazine devoted to the dissemination of the SPIRITUAL PHILOSOPHY, and it is consequently dependent upon the liberality of the friends of progress.

Intelligent minds will anxiously investigate the transcendental truths which are now being revealed to man. He who shuns investigation, imprisons his mind in the region of gloom and darkness.

NEW YORK, October 1, 1856.
